# SAFETY PRECAUTIONS

### Meanings of symbols displayed on indoor unit and/or outdoor unit

	WARNING (Risk of fire)         This unit uses a flammable refrigerant.           If refrigerant leaks and comes in contact with fire or heating part, it will create harmful gas and there is risk of fire.		
	Read the OPERATING INSTRUCTIONS carefully before operation.		
×.	Service personnel are required to carefully read the OPERATING INSTRUCTIONS and INSTALLATION MANUAL before operation.		
Further information is available in the OPERATING INSTRUCTIONS, INSTALLATION MANUAL, and the like.			
<ul> <li>Since rotating parts and parts which could cause an electric shock are used in this product, be sure to read these "Safety Prenautions" before use</li> <li>Meanings of symbols used in this manual</li> </ul>			

.....

:::

- be sure to read these "Safety Precautions" before use.
- Since the cautionary items shown here are important for safety, be sure to observe them. After reading this manual, keep it together with the installation manual in a handy place for easy reference.

### Marks and their meanings

A WARNING :	Incorrect handling could cause serious hazard, such as death, serious injury, etc. with a high probability.	
CAUTION :	Incorrect handling could cause serious hazard depending on the conditions.	

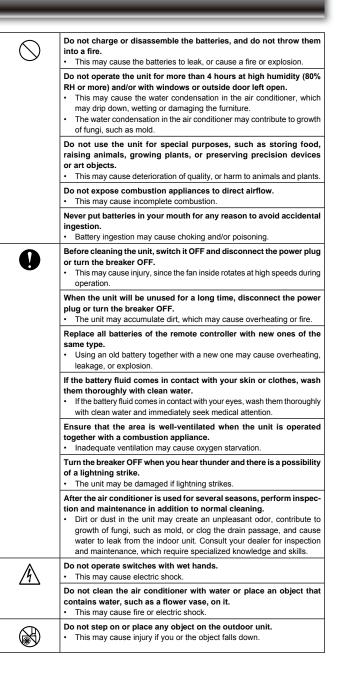

#### Do not connect the power cord to an intermediate point, use an $\bigcirc$ extension cord, or connect multiple devices to a single AC outlet. This may cause overheating, fire, or electric shock. Make sure the power plug is free of dirt and insert it securely into the outlet. A dirty plug may cause fire or electric shock. Do not bundle, pull, damage, or modify the power cord, and do not apply heat or place heavy objects on it. This may cause fire or electric shock.

- $\bigcirc$ : Be sure not to do.
- 0 : Be sure to follow the instruction.
- $(\mathcal{R})$ : Never insert your finger or stick, etc.
- $\bigotimes$ : Never step onto the indoor/outdoor unit and do not put anything on them.
- A : Danger of electric shock. Be careful.
- 8 : Be sure to disconnect the power supply plug from the power outlet.
- ✐ : Be sure to shut off the power.
- ∕ð : Risk of fire.
- $\otimes$ : Never touch with wet hand.
- $\otimes$ : Never splash water on the unit.

$\bigcirc$	<ul> <li>Do not turn the breaker OFF/ON or disconnect/connect the power plug during operation.</li> <li>This may create sparks, which can cause fire.</li> <li>After the indoor unit is switched OFF with the remote controller, make sure to turn the breaker OFF or disconnect the power plug.</li> </ul>
	Do not expose your body directly to cool air for a prolonged length of time. • This could be detrimental to your health.

# SAFETY PRECAUTIONS

$\bigcirc$	<ul> <li>The unit should not be installed, relocated, disassembled, altered, or repaired by the user.</li> <li>An improperly handled air conditioner may cause fire, electric shock, injury, or water leakage, etc. Consult your dealer.</li> <li>If the power supply cord is damaged, it must be replaced by the manufacturer or its service agent in order to avoid a hazard.</li> <li>When installing, relocating, or servicing the unit, make sure that no substance other than the specified refrigerant (R32) enters the refrigerant circuit.</li> <li>Any presence of foreign substance such as air can cause abnormal pressure rise and may result in explosion or injury.</li> <li>The use of any refrigerant other than that specified for the system will cause mechanical failure, system malfunction, or unit breakdown. In the worst case, this could lead to a serious impediment to securing product safety.</li> <li>This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.</li> <li>Children should be supervised to ensure that they do not play with</li> </ul>
	the appliance.
$\bigcirc$	<ul> <li>Do not insert your finger, a stick, or other objects into the air inlet or outlet.</li> <li>This may cause injury, since the fan inside rotates at high speeds during operation.</li> </ul>
00	<ul> <li>In case of an abnormal condition (such as a burning smell), stop the air conditioner and disconnect the power plug or turn the breaker OFF.</li> <li>A continued operation in the abnormal state may cause a malfunction, fire, or electric shock. In this case, consult your dealer.</li> </ul>
	<ul> <li>When the air conditioner does not cool or heat, there is a possibility of refrigerant leakage. If any refrigerant leakage is found, stop operations and ventilate the room well and consult your dealer immediately. If a repair involves recharging the unit with refrigerant, ask the service technician for details.</li> <li>The refrigerant used in the air conditioner is not harmful. Normally, it does not leak. However, if refrigerant leaks and comes in contact with fire or heating part of such a fan heater, kerosene heater, or cooking stove, it will create harmful gas and there is risk of fire.</li> <li>The user should never attempt to wash the inside of the indoor unit. Should the inside of the unit require cleaning, contact your dealer.</li> <li>Unsuitable detergent may cause damage to plastic material inside the unit, which may result in water leakage. Should detergent come in contact with electrical parts or the motor, it will result in a malfunction, smoke, or fire.</li> <li>The appliance shall be stored in a room without continuously operating ignition sources (for example: open flames, an operating gas appliance or an operating electric heater).</li> <li>Be aware that refrigerants may not contain an odour.</li> <li>Do not use means to accelerate the defrosting process or to clean the appliance, other than those recommended by the manufacturer.</li> <li>Do not pierce or burn.</li> <li>The indoor unit must be installed in rooms which exceed the floor space specified. Please consult your dealer.</li> <li>LNSO: 2.5 m<sup>2</sup></li> <li>LNSO: 2.5 m<sup>2</sup></li> </ul>
•	LN50HZ/60: 3.9 m <sup>2</sup> This appliance is intended to be used by expert or trained users in these in Units indextanced as former as for comparison as built.
J	shops, in light industry and on farms, or for commercial use by lay persons. Do not touch the air purifying device from the top of the indoor unit
	during operation.
$\bigcirc$	Do not touch the air inlet or the aluminum fins of the indoor/outdoor unit.         • This may cause injury.         Do not use insecticides or flammable sprays on the unit.         • This may cause a fire or deformation of the unit.         Do not expose pets or houseplants to direct airflow.         • This may cause injury to the pets or plants.         Do not place other electric appliances or furniture under the indoor/outdoor unit.         • Water may drip down from the unit, which may cause damage or malfunction.         Do not leave the unit on a damaged installation stand.         • The unit may fall and cause injury.         Do not step on an unstable bonch to operate or clean the unit.         • This may cause injury if you fall down.         Do not pull the power cord.
	<ul> <li>This may cause a portion of the core wire to break, which may cause overheating or fire.</li> </ul>

### IMPORTANT

Dirty filters cause condensation in the air conditioner which will contribute to the growth of fungi such as mold. It is therefore recommended to clean air filters every 2 weeks.

Before starting the operation, ensure that the horizontal vanes are in the closed position. If operation starts when the horizontal vanes are in the open position, they may not return to the correct position.

:

### SAFETY PRECAUTIONS

### For installation

$\bigcirc$	<ul> <li>Consult your dealer for installing the air conditioner.</li> <li>It should not be installed by the user since installation requires specialized knowledge and skills. An improperly installed air conditioner may cause water leakage, fire, or electric shock.</li> </ul>
	<ul> <li>Provide a dedicated power supply for the air conditioner.</li> <li>A non-dedicated power supply may cause overheating or fire.</li> </ul>
	Do not install the unit where flammable gas could leak. <ul> <li>If gas leaks and accumulates around the outdoor unit, it may cause an explosion.</li> </ul>
0	<ul> <li>Earth the unit correctly.</li> <li>Do not connect the earth wire to a gas pipe, water pipe, lightning rod, or a telephone earth wire. Improper earthing may cause electric shock.</li> </ul>
0	Install an earth leakage breaker depending on the installation location of the air conditioner (such as highly humid areas). <ul> <li>If an earth leakage breaker is not installed, it may cause electric shock.</li> </ul>
	<ul> <li>Ensure that the drain water is properly drained.</li> <li>If the drain passage is improper, water may drip down from the indoor outdoor unit, wetting and damaging the furniture.</li> </ul>

In case of an abnormal condition

Immediately stop operating the air conditioner and consult your dealer.

(Improper injury or de	handling may have serious consequences, including seriou ath.)
$\bigcirc$	This appliance can be used by children aged from 8 years and abo and persons with reduced physical, sensory or mental capabilities lack of experience and knowledge if they have been given super sion or instruction concerning use of the appliance in a safe way a understand the hazards involved.
	Children shall not play with the appliance. Cleaning and user main nance shall not be made by children without supervision.
	<ul> <li>Do not use the Wi-Fi interface nearby the medical electrical equipme or people who have a medical device such as a cardiac pacemak or an implantable cardioverter-defibrillator.</li> <li>It can cause an accident due to malfunctions of the medical equipme or device.</li> </ul>
	Do not install the Wi-Fi interface nearby the automatic control devic such as automatic doors or fire alarms. • It can cause accidents due to malfunctions.
	<ul> <li>Do not touch the Wi-Fi interface with wet hands.</li> <li>It can cause damage to the device, electric shock, or fire.</li> </ul>
$\otimes$	Do not splash water on the Wi-Fi interface or use it in a bathroom     It can cause damage to the device, electric shock, or fire.
0	When the Wi-Fi interface is dropped, or the holder or cable is da aged, disconnect the power supply plug or turn the breaker OFF.           • It may cause fire or electric shock. In this case, consult your dealer
(Improper handling may have consequences, including injury or damag to building.)	
$\bigcirc$	Do not step on unstable stepstool to set up or clean the Wi-Fi interfat • It may cause injury if you fall down.
$\bigcirc$	Do not use the Wi-Fi interface nearby other wireless devices, mice waves, cordless phones, or facsimiles.

For Wi-Fi interface

# JISPOSAL

To dispose of this product, consult your dealer.

### Note:

This symbol mark is for EU countries only. This symbol mark is according to the directive 2012/19/ EU Article 14 Information for users and Annex IX, and/ or to the directive 2006/66/EC Article 20 Information for end-users and Annex II.

Your MITSUBISHI ELECTRIC product is designed and manufactured with high quality materials and components which can be recycled and/or reused. This symbol means that electrical and electronic equipment, batteries and accumulators, at their end-of-life, should be disposed of separately from your household waste.

If a chemical symbol is printed beneath the symbol (Fig. 1), this chemical symbol means that the battery or accumulator contains a heavy metal at a certain concentration. This will be indicated as follows: Hg: mercury (0.0005%), Cd: cadmium (0.002%), Pb: lead (0.004%) In the European Union there are separate collection systems for used electrical and electrical ended and the second electrical and second electrical ended and the second electrical second elect

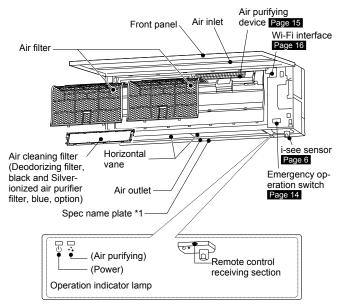

and electronic products, batteries and accumulators. Please, dispose of this equipment, batteries and accumulators correctly at your local community waste collection/recycling centre.

Please, help us to conserve the environment we live in!

(i-see) button Page 6	WEEKLY TIMER set     buttons Page 5, 13
CLOCK button Page 5	RESET button Page 5 Lid Slide the lid down to open the remote controller. Slide it down further to get to the weekly timer buttons.

Only use the remote controller provided with the unit. Do not use other remote controllers.

If 2 or more indoor units are installed in proximity to one another, an indoor unit

that is not intended to be operated may respond to the remote controller.

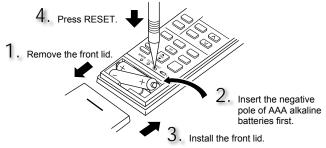

Outdoor units may be different in appearance.

\*1 The manufacturing year and month are indicated on the spec name plate.

# **REPARATION BEFORE OPERATION**

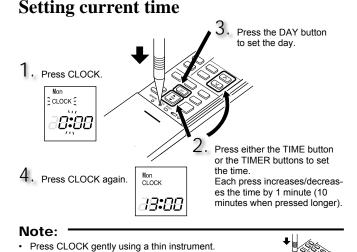

Before operation: Insert the power supply plug into the power outlet and/or turn the breaker on.

### Installing the remote controller batteries

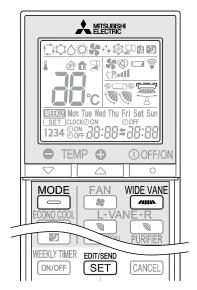

### Note:

- · Make sure the polarity of the batteries is correct.
- Do not use manganese batteries and leaking batteries. The remote controller could malfunction.
- Do not use rechargeable batteries.
- The battery replacement indicator lights up when the battery is running low. In about 7 days after the indicator starts lights up, the remote controller stops working.
- · Replace all batteries with new ones of the same type.
- Batteries can be used for approximately 1 year. However, batteries with expired shelf lives last shorter.
- Press RESET gently using a thin instrument.
- If the RESET button is not pressed, the remote controller may not operate correctly.

### Setting the installation position

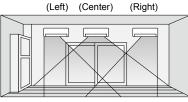

Be sure to set the remote controller in accordance with the installed position of the indoor unit.

### Installation position:

Left: Distance to objects (wall, cabinet, etc.) is less than 50 cm to the left Center: Distance to objects (wall, cabinet, etc.) is more than 50 cm to the left and right

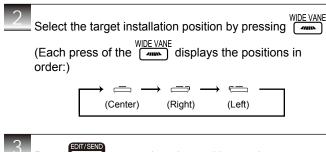

Right: Distance to objects (wall, cabinet, etc.) is less than 50 cm to the right

Area	Left	Center	Right
Remote controller display			

Hold down with the remote controller for 2 seconds to enter the position setting mode.

Press SET to complete the position setting.

### Note:

- The installation position can be set only when all the following conditions are met:
- The remote controller is powered off. Weekly timer is not set.
- Weekly timer is not being edited

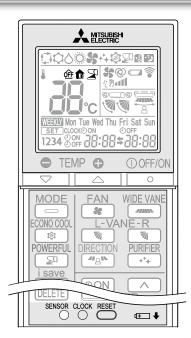

### Note:

How to set remote controller exclusively for a particular indoor unit A maximum of 4 indoor units with wireless remote controllers can be used in a room. To operate the indoor units individually with each remote controller, assign a number to each remote controller according to the number of the indoor unit. This setting can be set only when all the following conditions are met:

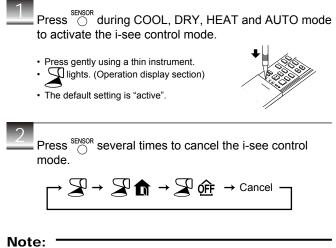

- The remote controller is powered OFF.
- (1) Hold down  $1 \sim 4$  button on the remote controller for 2 seconds to enter the pairing mode.
- (2) Press  $1 \rightarrow 4$  button again and assign a number to each remote controller. Each press of  $1 \rightarrow 4$  button advances the number in the following order:  $1 \rightarrow 2 \rightarrow 3 \rightarrow 4$ .
- (3) Press SET button to complete the pairing setting.

After you turn the breaker ON, the remote controller that first sends a signal to an indoor unit will be regarded as the remote controller for the indoor unit. Once they are set, the indoor unit will only receive the signal from the assigned remote controller afterwards.

In the i-see control mode, the room temperature is controlled based on the sensible temperature.

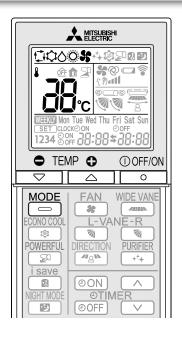

- Any person at the following places cannot be detected:
  - Along the wall on which the air conditioner is installed
  - Directly under the air conditioner
  - Where any obstacle, such as furniture, is between the person and the air conditioner
- A person may not be detected in the following situations:
  - Room temperature is high.
  - · A person wears heavy clothes and his/her skin is not exposed.
  - A heating element of which temperature changes significantly is present.
  - Some heat sources, such as a small child or pet, may not be sensed.
  - A heat source and the air conditioner are more than 6 m apart.
- A heat source does not move for a long time.

Do not touch the i-see sensor. This may cause malfunction of the i-see sensor. The intermittent operating sound is a normal sound produced when the i-see sensor is moving from side to side.

Refer to page 9 "Absence Detection" for m and OFF.

# Selecting operation modes

#### ① OFF/ON Press of to start the operation.

Press boot to select operation mode. Each press changes mode in the following order:

$$\rightarrow \ \textcircled{i} \rightarrow \ \textcircled{i} \rightarrow \ \textcircled{o} \rightarrow$$

Press  $\bigcirc$  or  $\bigcirc$  to set the temperature. Each press raises or lowers the temperature by 1°C.

① OFF/ON

Press or to stop the operation.

### 🕻 AUTO mode (Auto change over)

The unit selects the operation mode according to the difference between the room temperature and the set temperature. During AUTO mode, the unit changes mode (COOL↔HEAT) when the room temperature is about 2°C away from the set temperature for more than 15 minutes.

### Note:

Auto Mode is not recommended if this indoor unit is connected to a MXZ type outdoor unit. When several indoor units are operated simultaneously, the unit may not be able to switch operation mode between COOL and HEAT. In this case, the indoor unit becomes standby mode (Refer to table of Operation indicator lamp).

### 🗘 COOL mode

Enjoy cool air at your desired temperature.

### Note:

Do not operate COOL mode at very low outside temperatures (less than -10°C). Water condensed in the unit may drip and wet or damage furniture. etc.

### 🖒 DRY mode

Dehumidify your room. The room may be cooled slightly. Temperature cannot be set during DRY mode.

### 🔾 HEAT mode

Enjoy warm air at your desired temperature.

### 🛠 FAN mode

Circulate the air in your room.

### Note: '

After COOL/DRY mode operation, it is recommended to operate in the FAN mode to dry inside the indoor unit.

### Note:

### Multi system operation

Two or more indoor units can be operated by one outdoor unit. When several indoor units are operated simultaneously, cooling/dry/fan and heating operations cannot be done at the same time. When COOL/DRY/FAN is selected with one unit and HEAT with another or vice versa, the unit selected last goes into standby mode.

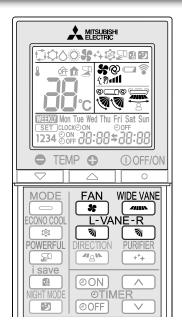

### **Operation indicator lamp**

The operation indicator lamp shows the operation state of the unit.

Indication	Operation state
* *	Standby mode (only during multi system operation)

☀ Lit ☆ Blinking

# FAN SPEED AND AIRFLOW DIRECTION ADJUSTMENT

### Fan speed direction

Press FAN to select fan speed. Each press changes fan speed in the following order:

• Two short beeps are heard from the indoor unit when set to AUTO.

- ${\mbox{\cdot}}$  Use higher fan speed to cool/heat the room quicker. It is recommended
- to lower the fan speed once the room is cool/warm.
- Use lower fan speed for quiet operation.

### Note:

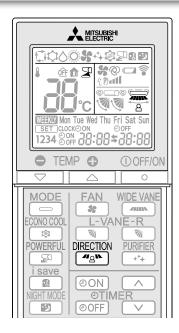

### Multi system operation

When several indoor units are operated simultaneously by one outdoor unit for heating operation, the temperature of the airflow may be low. In this case, it is recommended to set the fan speed to AUTO.

Up-down Airflow direction ........... Press Table To select airflow direction. Each press changes airflow direction in the following order: Ø (AUTO) (SWING) (4)(AUTO)....... The vane is set to the most efficient airflow direction. COOL/ DRY/FAN: horizontal position. HEAT: position (4). Manual)......For efficient air conditioning, select the upper position for COOL/DRY, and the lower position for HEAT. If the lower position is selected during COOL/DRY, the vane automatically moves to the upward position (1) after 0.5 to 1 hour to prevent any condensation from dripping. (Swing)......The vane moves up and down intermittently. • Two short beeps are heard from the indoor unit when set to AUTO. · Always use the remote controller when changing the direction of airflow. Moving the horizontal vanes with your hands causes them to malfunction · When the breaker is turned on, the horizontal vanes' position will be reset in about a minute, then the operation will start. The same is true in the emergency cooling operation. · When the horizontal vanes seem to be in an abnormal position, see page 17 · The right and left horizontal vanes set to the same level may not align perfectly. left-right Airflow direction Press wide vane to select airflow direction. Each press changes airflow direction in the following order:

# AIRFLOW CONTROL MODE

Airflow Control mode offers air conditioning according to a location of an occupant in a room detected by i-see Sensor.

DIRECTION
DIRECTION

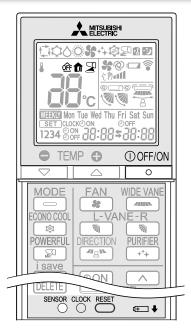

Press during COOL, DRY, HEAT or AUTO mode to activate the AIRFLOW CONTROL mode. This mode is only available when the i-see control mode is effective.

	ז h press of ne following	· · · ·	anges AIR	FLOW CO	NTROL
	→ <sup>A</sup> B (INDIRECT)	→		→ 7777 – (OFF)	
	(DIRECT)	direct a : Mainly be air- : The ur occupa	cupant will l airflow. the vicinity conditioned hit learns th ant spend r rens out the ea.	v of an occ d. le area wh nost of the	upant will ere an time,
• Wr CC • If y	rizontal and ve nen more than ONTROL mode rou still feel un DIRECT mode	a couple o may work le comfortable	f people are i ss effectively. with the air di	n a room, th rection deter	mined by the
3		:	wal waa da a	tomotional	

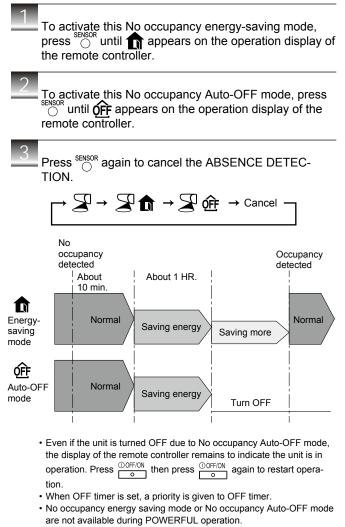

Cancelling the i-see control mode automatically cancels the AIRFLOW CONTROL mode.

The AIRFLOW CONTROL mode is also cancelled when the VANE or WIDE VANE buttons is pressed.

# $\operatorname{Absence}$ detection

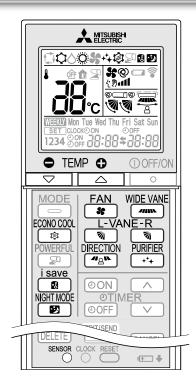

This function automatically changes the operation to No occupancy energy-saving mode or No occupancy Auto-OFF mode when nobody is in the room.

 The unit will not be turned off if no one is detected during normal operation mode, even though No occupancy Auto-OFF mode is activated.

## SAVE OPERATION

A simplified set back function enables to recall the preferred (preset) setting with a single push of the isave button. Press the button again and you can go back to the previous setting in an instance.

<u>i save</u> Press during COOL, ECONO COOL, or HEAT mode to select i-save mode.

- Set the temperature, fan speed, and airflow direction. • The same setting is selected from the next time by simply pressing i save
- · Two settings can be saved. (One for COOL/ECONO COOL, one for HEAT)
- · Select the appropriate temperature, fan speed, and airflow direction according to your room.

#### save Press again to cancel i-save operation.

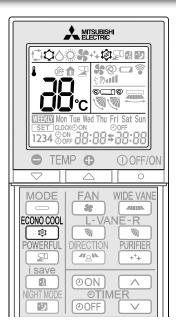

· i-save operation also is cancelled when the MODE or POWERFUL button is pressed.

### Note:

Example of use:

- 1. Low energy mode
- Set the temperature 2°C to 3°C warmer in COOL and cooler in HEAT mode. This setting is suitable for unoccupied room, and while you are sleeping. 2. Saving frequently used settings
- Save your preferred setting for COOL/ECONO COOL and HEAT. This enables you to select your preferred setting with a single push of the button.

# Econo cool operation

Swing airflow (change of airflow) makes you feel cooler than stationary airflow.

The set temperature and the airflow direction are automatically changed by the microprocessor. It is possible to perform cooling operation with keeping comfort. As a result energy can be saved.

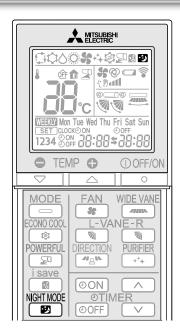

Press a during COOL mode page 7 to start ECONO COOL operation.

The unit performs swing operation vertically in various cycles according to the temperature airflow.

ECONO COOL Press again to cancel ECONO COOL operation.

· ECONO COOL operation is also cancelled when the VANE or POW-ERFUL button is pressed.

# **IGHT MODE OPERATION**

NIGHT mode changes the brightness of the operation indicator, disables the beep sound and limits the noise level of the outdoor unit.

Press During operation to activate NIGHT mode.

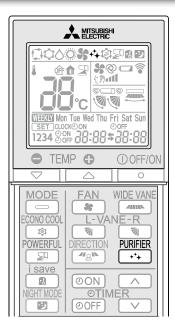

- · The operation indicator lamp dims.
- · The beep sound will be disabled except that emitted when the operation is started or stopped.
- · Noise level of the outdoor unit will be lower than that mentioned in SPECIFICATIONS.

NIGHT MODE Press D again to cancel NIGHT mode.

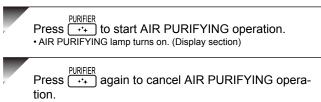

#### Note:

- Noise level of the outdoor unit may not change after start-up of the unit, during the protection operation, or depending on other operating conditions.
- The fan speed of the indoor unit will not change.
- The operation indicator lamp will be hard to be seen in a bright room.
- Operating POWERFUL operation during NIGHT mode will increase the noise level of the outdoor unit.
- Noise level of the outdoor unit will not decrease during Multi system operation.

# A IR PURIFYING OPERATION

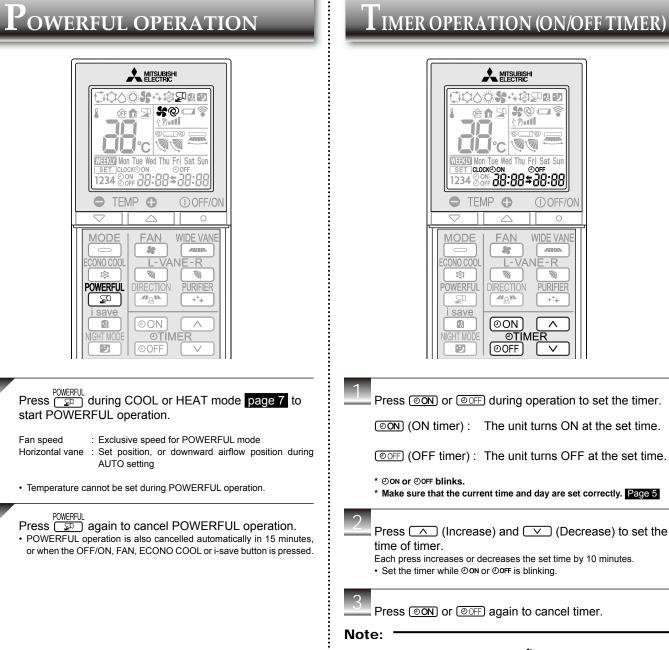

In the AIR PURIFYING operation, the indoor unit built-in device reduces airborne fungi, viruses, mold, and allergens.

· AIR PURIFYING lamp turns off. (Display section)

#### Note:

- Never touch the air purifying device during operation. Although the air purifying device is safety-conscious design, touching this device could be the cause of trouble as this device discharge high voltage electricity.
- A "hissing" sound may be heard during the air purifying operation. This sound is produced when plasma is being discharged. This is not a malfunction.
- Air purifying lamp does not turn on if the front panel is not closed completely.

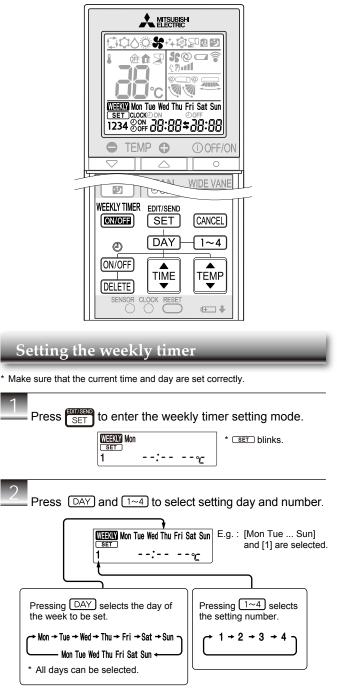

- ON and OFF timers can be set together. \$ mark indicates the order of timer operations.
- If power failure occurs while ON/OFF timer is set, see page 14 "Auto restart function".

# **V**EEKLY TIMER OPERATION

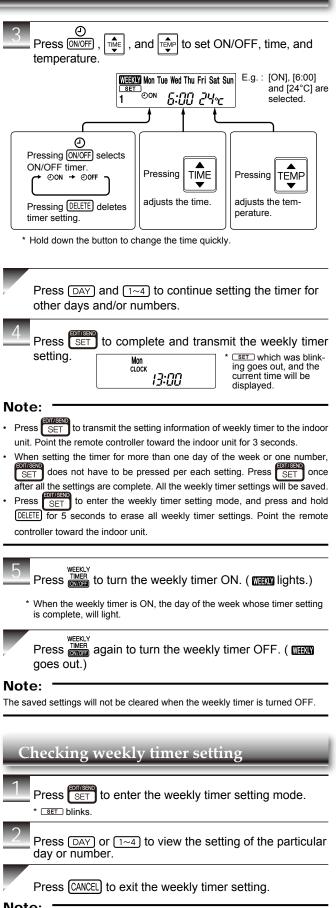

A maximum of 4 ON or OFF timers can be set for individual days of the week.
A maximum of 28 ON or OFF timers can be set for a week.

E.g. : Runs at 24°C from waking up to leaving home, and runs at 27°C from getting home to going to bed on weekdays. Runs at 27°C from waking up late to going bed early on weekends.								
Mon	Setting1	Setting2	Setting3	Setting4				
won	ON	OFF	ON	OFF				
(	24	°C	2	7°C				
Fri	6:00	8:30	17:30	22:00				
Sat		Setting1		Setting2				
Jai		ON		OFF				
(			27°C					
Sun		8:00		21:00				

### Note:

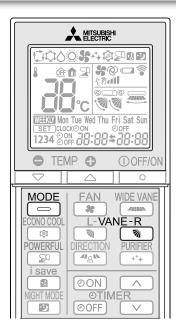

The simple ON/OFF timer setting is available while the weekly timer is on. In this case, the ON/OFF timer has priority over the weekly timer; the weekly timer operation will start again after the simple ON/OFF timer is complete.

### Note:

# **O**PERATION LOCK

This function locks operation mode only. Other functions, such as OFF/ON, temperature setting, or airflow direction adjustment, are available.

Hold down MODE and ARE simultaneously for 2 seconds while the unit is not operating to enable OPERA-TION LOCK.

The icon for the locked operation mode blinks.

Hold down  $\stackrel{\text{MODE}}{=}$  and  $\stackrel{\text{VANE-R}}{=}$  simultaneously for 2 seconds again while the unit is not operating to disable OPERATION LOCK.

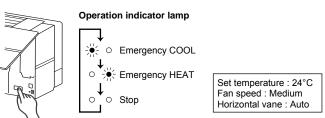

- The icon for the locked operation mode blinks when
   MODE and NODE are held down to enable or disable
   OPERATION LOCK or OPERATION LOCK is pressed during operation while OPERATION LOCK is enabled.
- AIR PURIFYING operation is not available when OP-ERATION LOCK is enabled in a mode other than FAN mode.

# **EMERGENCY OPERATION**

### When the remote controller cannot be used...

Emergency operation can be activated by pressing the emergency operation switch (E.O.SW) on the indoor unit.

Each time the E.O.SW is pressed, the operation changes in the following order:

### Note:

- The first 30 minutes of operation is test run. Temperature control does not work, and fan speed is set to High.
- In the emergency heating operation, the fan speed gradually rises to blow out warm air.
- In the emergency cooling operation, the horizontal vanes' position will be reset in about a minute, then the operation will start.

# **A**UTO RESTART FUNCTION

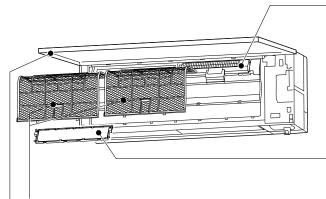

If a power failure occurs or the main power is turned off during operation, "Auto restart function" automatically starts operation in the same mode as the one set with the remote controller just before the shutoff of the main power. When timer is set, timer setting is cancelled and the unit starts operation when power is resumed.

If you do not want to use this function, please consult the service representative because the setting of the unit needs to be changed.

# LEANING

### Instructions:

- Switch off the power supply or turn off the breaker before cleaning.
- Be careful not to touch the metal parts with your hands.
- Do not use benzine, thinner, polishing powder, or insecticide Use only diluted mild detergents.
- Do not use a scrubbing brush, a hard sponge, or the like.

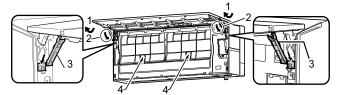

### Air filter

### **Clean every 2 weeks**

- Remove dirt by a vacuum cleaner, or rinse with water.
- · After washing with water, dry it well in shade.

### **Front panel**

- 1. Open the front panel
- Note: You cannot remove the front panel.
- 2. Rotate the stoppers as indicated by the arrows until they click.
- 3. Lower the front panel slowly and it will be held open with the stoppers.
- 4. Pinch the tabs on the filters; slightly push them up and pull down toward you to remove the filters

5. Close the front panel securely and press the posi-	Г
tions indicated by the arrows.	1

- 6. Clean the front panel without detaching it from the
  - unit

- Wipe with a soft dry cloth.
- Use the dedicated SOFT DRY CLOTH. Parts Number MAC-1001CL-E
  - Do not soak the front panel in water.

## Important

- The surface of the indoor unit is easily scratched, so never rub or hit the unit with something hard. Also, when installing or removing the front panel, handle it with care to prevent scratches on it.
- Do not use abrasive cleaner to prevent scratches on the surface of the indoor unit.
- It is very easy to get fingerprints on the surface of the indoor unit. When fingerprints are noticeable, gently wipe them off with a soft dry cloth.
- When using a commercially available chemical impregnated cloth, follow its instructions
- Do not leave the front panel open for a prolonged time.

### motion is based on REGULATION (EU) No 529/2012

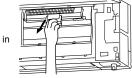

- Do not soak or rinse the horizontal vane
  - Do not use water hotter than 50°C
  - Do not expose parts to direct sunlight, heat, or fire to dry.
  - Do not apply excessive force on the fan as it may cause cracks or breakage.

## Air purifying device

Every 3 months:

Remove dirt by a vacuum cleaner When dirt cannot be removed by

#### vacuum cleaning:

### Soak the filter together with its frame in lukewarm water and rinse it.

· After washing, dry it well in shade.

### Air cleaning filter (Deodorizing filter, black)

### Everv 3 months:

- · Remove dirt by a vacuum cleaner, or soak the framed filter in lukewarm water (30 to 40°C) for about 15 minutes. Rinse well.
- After washing, dry it well in shade.
- Deodorizing feature recovers by cleaning the filter.
- When dirt or smell cannot be removed by cleaning:
- · Replace it with a new air cleaning filter.
- Parts Number MAC-3010FT-E

### and

### (Silver-ionized air purifier filter, blue, option)

- Every 3 months: Remove dirt by a vacu-
- um cleaner

### When dirt cannot be

### removed by

vacuum cleaning: Soak the filter and its frame in lukewarm wa-

in shade. Install all tabs

#### of the air filter. Every year:

- Replace it with a new air cleaning filter for best performance.
- Parts Number MAC-2390FT-E

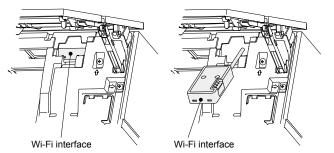

### Important

- Clean the filters regularly for best performance and to reduce power consumption.
- Dirty filters cause condensation in the air conditioner which will contribute to the growth of fungi such as mold. It is therefore recommended to clean air filters every 2 weeks.
- Do not touch the i-see sensor.
- The air purifying device does not function for safety for a couple minutes after the operation starts or the front panel is opened/closed.
- Do not disassemble the air purifying device.
- Do not touch any parts other than the frame of the air purifying device.

# $\mathcal N$ i-fi interface setting up

This Wi-Fi interface, communicates the status information and controls the commands from the MELCloud by connecting to an indoor unit.

### Wi-Fi interface introduction

No.	Item	Description
1	MODE switch	It selects modes.
2	RESET switch	It resets the system and ALL settings.
3	ERR LED (Orange)	It shows the network error state.
4	NET LED (Green)	It shows the network state.
5	MODE LED (Orange)	It shows the Access point mode state.
6	UNIT LED (Green)	It shows the indoor unit state.

### (1) MODE switch

The MODE switch is used for selecting modes in configurations.

### (2) RESET switch

- Hold down the RESET switch for 2 seconds to reboot the system.
- Hold down the RESET switch for 14 seconds to initialize the Wi-Fi interface to the factory default.

When the Wi-Fi interface is reset to the factory default, ALL the configuration information will be lost. Take great care in implementing this operation. Open the front panel and remove the Wi-Fi interface. Page 15 (Front panel)
 Set up a connection between the Wi-Fi interface and the router. Refer to the SETUP MANUAL and SETUP QUICK REFERENCE GUIDE provided with the unit.
 For SETUP MANUAL, please go to the website below. http://www.melcloud.com/Support

Put the Wi-Fi interface back and close the front panel after the setup is completed. Page 15 (Front panel)

#### 4

 For MELCloud User Manual, please go to the website below.

http://www.melcloud.com/Support

#### Note:

- Ensure that the Router supports the WPA2-AES encryption setting before starting the Wi-Fi interface setup.
- The End user should read and accept the terms and conditions of the Wi-Fi service before using this Wi-Fi interface.
- To complete connection of this Wi-Fi interface to the Wi-Fi service, the Router may be required.
- This Wi-Fi interface will not commence transmission of any operational data from the system until the End user registers and accepts the terms and conditions of the Wi-Fi service.
- This Wi-Fi interface should not be installed and connected to any Mitsubishi Electric system which is to provide application critical cooling or heating.
  Please write down the information regarding the Wi-Fi interface setting on the
- At the time of relocation or disposal, reset the Wi-Fi interface.
  At the time of relocation or disposal, reset the Wi-Fi interface to the factory default.

Mitsubishi Electric's Wi-Fi interface is designed for communication to Mitsubishi Electric's MELCloud Wi-Fi service. Third party Wi-Fi interfaces cannot be connected to MELCloud. Mitsubishi Electric is not responsible for any (i) underperformance of a system or any product;

(ii) system or product fault; or (iii) loss or damage to any system or product; which is caused by or arises from connection to and/or use of any third party Wi-Fi interface or any third party Wi-Fi service with Mitsubishi Electric equipment.

For the latest information regarding MELCloud from Mitsubishi Electric Corporation, please visit http://www.melcloud.com/

# WHEN YOU THINK THAT TROUBLE HAS OCCURRED

# Even if these items are checked, when the unit does not recover from the trouble, stop using the air conditioner and consult your dealer.

Sumptom	Evaluation & Check reints
Symptom Indoor Unit	Explanation & Check points
The unit cannot be operated.	Is the breaker turned on?     Is the power supply plug connected?     Is the ON timer set? Page 12
The horizontal vane does not move.	<ul> <li>Are the horizontal vane and the vertical vane installed correctly?</li> <li>Is the fan guard deformed?</li> <li>When the breaker is turned on, the horizontal vanes' position will be reset in about a minute. After the reset has completed, the normal horizontal vanes' operation resumes. The same is true in the emergency cooling operation.</li> </ul>
The unit cannot be operated for about 3 minutes when restarted.	This protects the unit according to instructions from the microprocessor. Please wait.
Mist is discharged from the air outlet of the indoor unit.	The cool air from the unit rapidly cools moisture in the air inside the room, and it turns into mist.
The swing operation of the HORI- ZONTAL VANE is suspended for a while, then restarted.	This is for the swing operation of the HORIZON- TAL VANE to be performed normally.
When SWING is selected in COOL/DRY/FAN mode, the lower horizontal vane does not move.	<ul> <li>It is normal that the lower horizontal vane does not move when SWING is selected in COOL/ DRY/FAN mode.</li> </ul>
The airflow direction changes during operation. The direction of the horizontal vane cannot be adjusted with the remote controller.	<ul> <li>When the unit is operated in COOL or DRY mode, if the operation continues with air blow- ing down for 0.5 to 1 hour, the direction of the airflow is automatically set to upward position to prevent water from condensing and dripping.</li> <li>In the heating operation, if the airflow tem- perature is too low or when defrosting is being done, the horizontal vane is automatically set to horizontal position.</li> </ul>
The operation stops for about 10 minutes in the heating operation.	<ul> <li>Outdoor unit is in defrost. Since this is completed in max. 10 minutes, please wait. (When the outside temperature is too low and humidity is too high, frost is formed.)</li> </ul>
The unit starts operation by itself when the main power is turned on, but hasn't received sign from the remote controller.	<ul> <li>These models are equipped with an auto restart function. When the main power is turned off without stopping the unit with the remote controller and is turned on again, the unit starts operation automatically in the same mode as the one set with the remote control- ler just before the shutoff of the main power. Refer to "Auto restart function". Page 14</li> </ul>
The two horizontal vanes touch each other. The horizontal vanes are in an abnormal posi- tion. The horizontal vanes do not return to the correct "close position". In COOL/DRY mode, when the	Perform one of the following: • Turn off and on the breaker. Make sure the hori- zontal vanes move to the correct "close position". • Start and stop the emergency cooling operation and make sure the horizontal vanes move to the correct "close position".
room temperature reaches near the set temperature, the outdoor unit stops, then the indoor unit operates at low speed.	<ul> <li>When the room temperature deviates from the set temperature, the indoor fan starts running according to the settings on the remote control- ler.</li> </ul>
The indoor unit discolors over time.	<ul> <li>Although plastic turns yellow due to the influence of some factors such as ultraviolet light and temperature, this has no effect on the product functions.</li> </ul>
The operation indicator lamp is dim. The unit does not beep.	Is the NIGHT mode set?
Multi system	
The indoor unit which is not operating becomes warm and a sound, similar to water flowing, is heard from the unit.	<ul> <li>A small amount of refrigerant continues to flow into the indoor unit even though it is not operat- ing.</li> </ul>
When heating operation is selected, operation does not start right away.	When operation is started during defrosting of outdoor unit is done, it takes a few minutes (max. 10 minutes) to blow out warm air.
Outdoor Unit	
The fan of the outdoor unit does not rotate even though the com- pressor is running. Even if the fan starts to rotate, it stops soon.	<ul> <li>When the outside temperature is low during cooling operation, the fan operates intermittently to maintain sufficient cooling capacity.</li> </ul>
Water leaks from the outdoor unit.	<ul> <li>During COOL and DRY operations, pipe or pipe connecting sections are cooled and this causes water to condense.</li> <li>In the heating operation, water condensed on the heat exchanger drips down.</li> <li>In the heating operation, the defrosting operation makes ice forming on the outdoor unit melt and drip down.</li> </ul>
White smoke is discharged from the outdoor unit.	<ul> <li>In the heating operation, vapor generated by the defrosting operation looks like white smoke.</li> </ul>

is dim. The indoor unit does not respond to the remote control ignal. The operation mode cannot be changed. Does not cool or heat The room cannot be cooled or heated sufficiently.	Symptom	Explanation & Check points

# When you think that trouble has occurred

### In the following cases, stop using the air conditioner and consult your dealer.

- When water leaks or drips from the indoor unit.
- When the operation indicator lamp blinks.
- When the breaker trips frequently.
  The remote control signal is not received in a room where an electronic ON/OFF type fluorescent lamp (inverter-type fluorescent lamp, etc.) is used.
  Operation of the air conditioner interferes with radio or TV reception. An amplifier may be required for the affected device.
- When an abnormal sound is heard.
- · When any refrigerant leakage is found.

# When the Air conditioner is not going to be used for a long time

# Operate by COOL mode with the highest temperature set or FAN mode for 3 to 4 hours. Page 7

- This dries the inside of the unit.
- Moisture in the air conditioner contributes to favorable conditions for growth of fungi, such as mold.

Press of to stop the operation.

Turn off the breaker and/or disconnect the power supply plug.

Remove all batteries from the remote controller.

### When using the air conditioner again:

Clean the air filter. Page 15

Check that the air inlet and outlet of the indoor and outdoor units are not blocked.

Check that the earth is connected correctly.

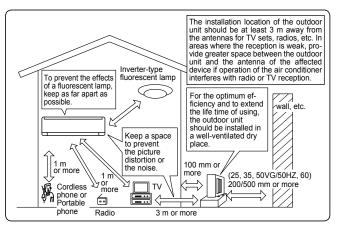

Refer to the "PREPARATION BEFORE OPERATION", and follow the instructions. Page 5

# **I**NSTALLATION PLACE AND ELECTRICAL WORK

### **Installation place**

### Avoid installing the air conditioner in the following places.

- Where there is much machine oil.
- Salty places such as the seaside.
   Where sulfide cas is generated such as he
- Where sulfide gas is generated such as hot spring, sewage, waste water.
   Where oil is splashed or where the area is filled with oily smoke (such as cooking areas and fortuning in which the program of and do a photogram of an area is a splashed or where the area is splashed by a photogram of an area is a splashed by a splashed or where the area is a splashed by a splashed or where the area is a splashed by a
- and factories, in which the properties of plastic could be changed and damaged).
  Where there is high-frequency or wireless equipment.
- Where the air from the outdoor unit air outlet is blocked.
- Where the operation sound or air from the outdoor unit bothers the house next door.
  The mounting height of indoor unit 1.8 m to 2.3 m is recommended. If it is impossible, please consult your dealer.
- Do not operate the air conditioner during interior construction and finishing work, or while waxing the floor. Before operating the air conditioner, ventilate the room well after such work is performed. Otherwise, it may cause volatile elements to adhere inside the air conditioner, resulting in water leakage or scattering of dew.
- Do not use the Wi-Fi interface nearby the medical electrical equipment or people who have a medical device such as a cardiac pacemaker or an implantable cardioverter-defibrillator.
- It can cause an accident due to malfunctions of the medical equipment or device.
- This equipment should be installed and operated with a minimum distance of 20 cm between the device and the user or bystanders.
- Do not use the Wi-Fi interface nearby other wireless devices, microwaves, cordless phones, or facsimiles.
   It can cause malfunctions

### **Electrical work**

- · Provide an exclusive circuit for the power supply of the air conditioner.
- Be sure to observe the breaker capacity.
- If you have any questions, consult your dealer.

MITSUBISHI ELECTRIC CONSUMER PRODUCTS (THAILAND) CO., LTD AMATA NAKORN INDUSTRIAL ESTATE 700/406 MOO 7, TAMBON DON HUA ROH, AMPHUR MUANG, CHONBURI 20000, THAILAND

hereby declares under its sole responsibility that the air conditioners and heat pumps described below for use in residential, commercial and light-industrial environments: erklärt hiermit auf seine alleinige Verantwortung, dass die Klimaanlagen und Wärmepumpen für das häusliche, kommerzielle und leicht-industrielle Umfeld wie unten beschrieben: déclare par la présente et sous sa propre responsabilité que les climatiseurs et les pompes à chaleur décrits ci-dessous, destinés à un usage dans des environnements résidentiels, commerciaux et d'industrie légère : verklaart hierbij onder eigen verantwoordelijkheid dat de voor residentiële, commerciële en licht-industriële omgevingen bestemde airconditioners en warmtepompen zoals onderstaand

beschreven:

por la presente declara bajo su única responsabilidad que los acondicionadores de aire y bombas de calor descritas a continuación para su uso en entornos residenciales, comerciales y de industria ligera: conferma con la presente, sotto la sua esclusiva responsabilità, che i condizionatori d'aria e le pompe di calore descritti di seguito e destinati all'utilizzo in ambienti residenziali, com-

merciali e semi-industriali: με το παρόν πιστοποιεί με αποκλειστική της ευθύνη ότι οι τα κλιματιστικά και οι αντλίες θέρμανσης που περιγράφονται παρακάτω για χρήση σε οικιακό, επαγγελματικό και ελαφριάς βιομηχανίας περιβάλλοντα:

através da presente declara sob sua única responsabilidade que os aparelhos de ar condicionado e bombas de calor abaixo descritos para uso residencial, comercial e de indústria

ligeira: erklærer hermed under eneansvar, at de herunder beskrevne airconditionanlæg og varmepumper til brug i privat boligbyggeri, erhvervsområder og inden for let industri

enkaser inemed att luftkonditioneringama och värmepumpara som beskrivs nedan för användning i bostäder, kommersiella miljöer och lätta industriella miljöer: ev, ticaret ve hafif sanayi ortamlarında kullanım amaçlı üretilen ve aşağıda açıklanan klima ve ısıtma pompalarıyla ilgili aşağıdaki hususları yalnızca kendi sorumluluğunda beyan eder: gekrapupa на coso coбcraeeha orrosophocr, ve климатиците и термопомпите, описани по-долу, за употреба в жилицни, търговски и леки промишлени условия: erklærer et fullstendig ansvar for undernevnte klimaanlegg og varmepumper ved bruk i boliger, samt kommersielle og letindustrielle miljøer: vakuuttaa täten yksinomaisella vastuullaan, että jäljempänä kuvatut asuinrakennuksiin, pienteollisuuskäyttöön ja kaupalliseen käyttöön tarkoitetut ilmastointilaitteet ja lämpöpumput: настоящим заявляет и берет на себя исключительную ответственность за то, что кондиционеры и тепловые насосы, описанные ниже и предназначенные для эксплуатации

в жилых помещениях, торговых залах и на предприятиях легкой промышленности: niniejszym oświadcza na śwoją wyłączną odpowiedzialność, że klimatyzatory i pompy ciepła opisane poniżej, są przeznaczone do zastosowań w środowisku mieszkalnym, handlowym i lekko uprzemysłowionym:

MITSUBISHI ELECTRIC, MSZ-LN25VGW/MUZ-LN25VG, MSZ-LN25VGW/MUZ-LN25VGHZ, MSZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/MUZ-LN25VGV/ MSZ-LN25VGR/MUZ-LN25VG, MSZ-LN25VGR/MUZ-LN25VGHZ, MSZ-LN25VGB/MUZ-LN25VG, MSZ-LN25VGB/MUZ-LN25VGHZ MSZ-LN35VGW/MUZ-LN35VG, MSZ-LN35VGW/MUZ-LN35VGHZ, MSZ-LN35VGV/MUZ-LN35VG, MSZ-LN35VGV/MUZ-LN35VGHZ MSZ-LN35VGR/MUZ-LN35VG, MSZ-LN35VGR/MUZ-LN35VGHZ, MSZ-LN35VGB/MUZ-LN35VG, MSZ-LN35VGB/MUZ-LN35VGHZ MSZ-LN50VGW/MUZ-LN50VG, MSZ-LN50VGW/MUZ-LN50VGHZ, MSZ-LN50VGV/MUZ-LN50VG, MSZ-LN50VGV/MUZ-LN50VGHZ MSZ-LN50VGR/MUZ-LN50VG, MSZ-LN50VGR/MUZ-LN50VGHZ, MSZ-LN50VGB/MUZ-LN50VG, MSZ-LN50VGB/MUZ-LN50VGHZ MSZ-LN60VGW/MUZ-LN60VG, MSZ-LN60VGV/MUZ-LN60VG, MSZ-LN60VGR/MUZ-LN60VG, MSZ-LN60VGB/MUZ-LN60VG
