

## HWF WATER/WATER chillers with twin screw compressor

Cooling capacity from 630 up to 1529 kW  
Heating capacity from 670 up to 1609 kW

### RI34a

Aermech participates in the EUROVENT Certification Program up to 1500 kW  
The products of interest figure in the EUROVENT Guide of Certified products.

- **OPTIMISED FOR HIGH CONDENSATION TEMPERATURES**  
**for example appliances functioning also in heating mode**
- **STANDARD AND HIGH EFFICIENCY VERSION**
- **CONDENSER WATER OUTLET TEMPERATURE MAXIMUM TEMPERATURE: 60°C**
- **SHELL AND TUBE HEAT EXCHANGERS**
- **STANDARD ELECTRONIC THERMOSTATIC VALVE, WHICH ALLOWS:**
  - **THE PRODUCTION OF REFRIGERATED WATER UP TO -6 °C**
  - **ADJUSTMENT OF THE COOLING CAPACITY VIA CONTINUOUS MODULATION 12.5-100%**

#### Features

- 8 sizes
- Two circuits
- High efficiency screw compressors optimised for R134a
- Heat exchangers with very large exchange surfaces
- **Electronic thermostatic valve as standard**
- Compact dimensions
- Suitable for use in heat pump mode with temperature of water produced up to 60°C (with hydraulic inversion) and in the presence of liquid chiller. **For functioning in heating mode envision the IS accessory, condensers isolation**
- **Extended operational limits**
- **temperature of the water exiting the condenser up to 60 °C**
- temperature of the water exiting the evaporator to -6 °C
- **Available set-ups:**
  - partial heat recovery
  - total heat recovery
  - moto-evaporating reduced sound emission owing to compressors enclosed by thick galvanised sheet steel panels with high density sound-absorbent capacity
  - **Microprocessor modular adjustment**
  - Redundancy of the components (one microprocessor per circuit)
  - Outlet water temperature control with continuous adjustment of capacity (12.5-100% for each compressor) and dynamic display of the cooling capacity
  - Control boards will numbered cables
  - Condensation control with 0-10Vdc signal for the management of a modulating valve/variable speed pump depending on the pressure
  - Standard amperometric transformer for each compressor
  - "Always Working" Function: in critical conditions, the machine does not stop but can self-adjust
  - Automatic compensation of the Set Points with analogue input from 4 to 20 mA or 0-10 V or external air probe
  - Self-adapting differential work switch to always assure the correct compressor functioning times
  - PDC "Pull Down Control" System: prevents the increase in power when the water temperature quickly approaches the set-point
  - DL "Demand Limit": allows to limit electrical absorption of the machine in the case of insufficient electrical power (load peaks or start-up of generators).
  - Multi-language display of the parameters

#### Accessories

- **AER485P1:** RS-485 interface for supervising systems with MODBUS protocol.
- **PRV3:** Allows to control the chiller at a distance.
- **RIF:** Current rephaser. Connected in parallel to the motor, it allows a reduction of the input current (about 10%).  
**It can only be installed in the factory.**
- **AVX:** Spring anti-vibration mounts.
- **AERWEB30:** the AERWEB device allows the remote control of a chiller from a common PC by means of a serial connection. By using additional modules the device allows control of the chiller by telephone network, using the **AERMODEM** accessory or GSM network, using the **AERMODEMGSM** accessory. The AERWEB can pilot up to 9 chillers, each of which **must be equipped with the AER485 or AER485P2 accessory.**
- **MULTICHILLER:** Control system for control, switch-on and switch-off of the single chillers in a plant in where multiple units are installed in parallel, always ensuring constant flow to the evaporators.
- **AKW (ACOUSTIC KIT):** Allows to lower the noise further via panelling of the machine optimised with high density ecological material. **Only available in L versions. It can only be installed in the factory.**
- **IS:** Isolation kit for condensers. Mandatory accessory for machine functioning in heat pump mode.  
**It can only be installed in the factory.**

## Choosing the unit

By appropriately combining the variety of options available, it is possible to configure every model in a manner that satisfies all specific implant requirements.

### Fields configurator:

#### Identification:

HWF

#### Size:

2512, 2812, 3212, 3612, 4212, 4812, 5612, 6412

#### Model:

° - Optimised for high condensations

#### Versions:

° - Standard

A - High efficiency

#### Set-up:

° - Standard

L - Silenced

#### Heat recovery units:

° - Without heat recovery units

D - with partial recovery

T - with total recovery (not available for unit E)

#### Condenser:

° - Standard

E - Motor-evaporating

#### Power supply:

° - 400V 3~50Hz with fuses

8 - 400V 3~50Hz with magnet circuit breakers

5 - 500V 3~50Hz with fuses (only for 2512 and 2812)

9 - 500V 3~50Hz with magnet circuit switches (only for 2512 and 2812)

**Caution:** the standard options are represented by the ° symbol;

Example of a sale code: **HWF2512A8**

This is a high efficiency HWF unit, with size 2512 in Standard version, with PED standard heat exchangers and electric control board for compressors with 400V 3~ 50Hz motors with magnet circuit breakers.

As it has been noted, as every option is represented unmistakably from all others, it is not necessary to indicate the standard options within the marketing brand (identified by °).
