

NRP

Multipurpose air-condensed units with axial fans

R410A

- UNITS DESIGNED FOR 2 AND 4-PIPE OUTDOOR INSTALLATION
- HIGH EFFICIENCY VERSION

Features

NRP is the range of multipurpose outdoor units operating with R410A refrigerant, designed for 2 or 4-pipe applications. Just one unit is capable of satisfying the hot and cold water demand simultaneously and independently as needed during any time of the year with a system which requires no season changeover.

Range:

- R410A refrigerant.
- 2 cooling circuits.
- High efficiency also at partial loads.
- Heat exchangers optimised to make use of the excellent heat exchange features of R410A.
- High efficiency scroll compressors.

- Axial fans with reduced sound emission.
- Extremely solid structure with anti-corrosion polyester paint.
- Extended operational limits in heat pump functioning mode:
 - Max. temperature of produced water 55°C.
 - Max. temperature of external air 30°C.
- As per standard the units mount DCPX, which allows them to work correctly during the winter with outside temperatures as low as - 10 °C, as well as hot environment operation with outside temperatures up to 42°C.
- Available versions:
 - "A" High efficiency heat pump.
 - "E" High efficiency silenced heat pump.
- Ventilation Unit:
 - "o" Standard.
 - "M" Increased.
 - "J" Inverter.
- Versions with pumping unit and tank complete with water filter, flow meter, expansion vessel.
- Microprocessor adjustment.

Accessories

- **VT:** Anti-vibration mounts to be installed under the base of the unit.
- **GP:** Protection grid, protects the external coils from blows.
- **TRX1:** Metal cap that replaces the plastic cap mounted for protection in the storage tanks with holes and integrative resistances.
- **DRE:** Initial starting current reduction electronic device (approximately 26% in dual circuit). Available only with 400V power supply. **Can only be applied in the factory.**
- **RIF:** Current rephaser. Connected in parallel to the motor, it allows a reduction of the input current (approx. 10%). **Can only be applied in the factory.**

- **AER485P1:** RS-485 interface for supervising systems with MODBUS protocol.
- **AERWEB300:** Accessory AERWEB allows remote control of a chiller through a common PC and an ethernet connection over a common browser; 4 versions available:
AERWEB300-6: Web server to monitor and remote control max. 6 units in RS485 network;
AERWEB300-18: Web server to monitor and remote control max. 18 units in RS485 network;
AERWEB300-6G: Web server to monitor and remote control max. 6 units in RS485 network with integrated GPRS modem;

AERWEB300-18G: Web server to monitor and remote control max. 18 units in RS485 network with integrated GPRS modem;

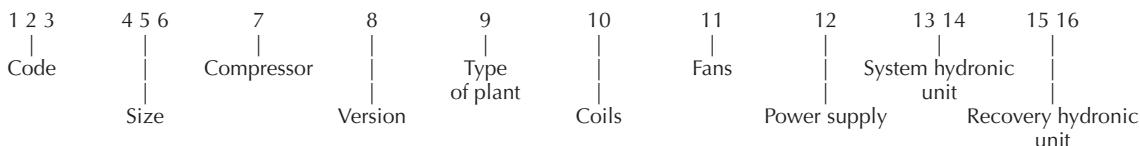

- **PGD1:** Graphical display, which allows complete management of the unit like the one on board the machine. Can be controlled up to 50 m away with a telephone cable, 200 m with a shielded AWG 24 cable.

Choosing the unit

By appropriately combining the variety of options available, it is possible to configure every model in a manner that satisfies all specific system requirements.

Fields configurator:

Code:

NRP

Size:

020, 024, 028, 030, 033, 035, 050, 055, 060, 065, 070, 075

Compressors:

0 - Standard compressors with R410A

Version:

A - High efficiency
E - Silenced high efficiency

Type of plant:

2 - 2-pipe systems
4 - 4-pipe systems

Coils:

- - In aluminium
- R - In copper
- S - In tinned copper
- V - Painted (epoxy paint)

Fans:

- - Standard
- M - Increased (only 0200-0350)
- J - Increased inverters (only 0500-0750)

Power supply:

- - 400V/3N/50Hz with magnet circuit breakers
- 1 - 230V/3/50Hz with magnet circuit breakers
(not available from size 0200, 0240, 0750)
- 2 - 500V/3/50Hz with magnet circuit breakers
(not available for sizes 0200, 0240, 0350, 0500, 0550, 0700, 0750
contact the head office)

Attention: Sizes 020 to 035 are only available in version "E"

SYSTEM SIDE HYDRONIC KIT

- 00 - Without storage tank
- 01 - Storage tank | low static pressure pump | system side
- 02 - Storage tank | low static pressure pump | reserve pump | system side
- 03 - Storage tank | high static pressure pump | system side
- 04 - Storage tank | high static pressure pump | reserve pump | system side
- 05 - Storage tank with holes for integrative resistance | low static pressure pump | system side
- 06 - Storage tank with holes for integrative resistance | low static pressure pump | reserve pump | system side
- 07 - Storage tank with holes for integrative resistance | high static pressure pump | system side
- 08 - Storage tank with holes for integrative resistance | high static pressure pump | reserve pump | system side
- P1 - Low static pressure pump | system side
- P2 - Low static pressure pump | reserve pump | system side
- P3 - High static pressure pump | system side
- P4 - High static pressure pump | reserve pump | system side

DHW SIDE HYDRONIC KIT:

- 00 - Without Pumps
- R1 - Low static pressure pump
- R2 - Low static pressure pump | reserve pump
- R3 - High static pressure pump
- R4 - High static pressure pump | reserve pump

Sound power															
Aermec determines sound power values in agreement with the ISO 9614-2 Standard, in compliance with that requested by Eurovent certification.															
Sound pressure															
Sound pressure measured in free field conditions with reflective surface (directivity factor Q=2) at 10mt distance from external surface of unit, in compliance with EN ISO 3744 regulations.															
* DHW SIDE/SYSTEM SIDE															
DHW side , production of domestic hot water, in 2-pipe systems.															
System side , production of hot water, in 4-pipe systems.															

① Cooling
TEvaporator outlet water temperature 7°C
External air temperature 35 °C
ΔT water 5°C

② HEATING
Condenser outlet water temperature 45°C
External air temperature 7°C b.s. 6°C b.u.
ΔT water 5°C

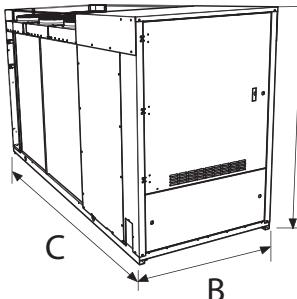

③ Cooling with recovery
Recovery outlet water temperature 45 °C
Evaporator outlet water temperature 7°C
ΔT water 5°C

Sound power
Aermec determines sound power values in agreement with the ISO 9614-2 Standard, in compliance with that requested by Eurovent certification.

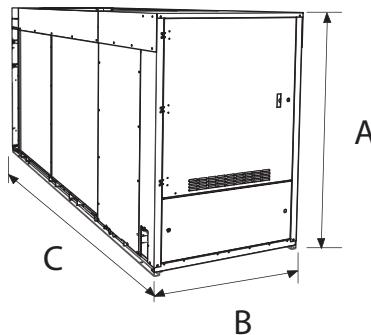

Sound pressure
Sound pressure measured in free field conditions with reflective surface (directivity factor Q=2) at 10mt distance from external surface of unit, in compliance with EN ISO 3744 regulations.

*** DHW SIDE/SYSTEM SIDE**
DHW side, production of domestic hot water, in 2-pipe systems.
System side, production of hot water, in 4-pipe systems.
