FCX-U

Plasmacluster

PLASMACLUSTER ionising filter.

Plasmacluster is capable of reducing the level of pollutants, by decomposing the molecules that form them.

Using a series of electric shocks, "Plasmacluster" causes the water molecules present in the air to separate into positive and negative ions. These ions neutralise the gas pollutant molecules, forming products that are normally present in clean air.

The result is in the air: you can finally breath clean, odour-free ionised air.

Features

- Available in 14 sizes and 7 versions:
 - FCX-A:** vertical free-standing with switch
 - FCX-AS:** vertical free-standing without switch
 - FCX-ACB:** vertical free-standing with simplified electronic thermostat
 - FCX-ACT:** vertical free-standing with electronic thermostat
 - FCX-APC:** (FCX 22, 32, 42, 50, 62 and 82) vertical free-standing with electronic thermostat, equipped with Plasmacluster ionizing filter
 - FCX-U:** universal free-standing or wall/ceiling mounting
 - FCX-UE:** universal free-standing and wall/ceiling mounting with direct expansion coil
- Versions with 3 row coil (FCX 17, 22, 32, 42, 50, 62, 82 and 102)
- Versions with 4 row coil (FCX 24, 34, 44, 54, 64 and 84)
- EUROVENT certified
- 3-speed fan unit
- Full compliance with safety regulations
- Soft, flowing lines
- Adjustable air delivery louver on versions U and UE, except models 62, 82 and 102
- Automatic power-off function with closure of the air delivery louver
- Broad range of controls
- Metallic protective cabinet with rustproof polyester paint
- Low noise operation
- Reduced pressure drops across heat exchangers
- Motors with permanently connected condensers
- Easy installation and maintenance
- Air filter easily removed and cleaned
- Removable blades for easy and effective cleaning
- Water connections reversibility during installation

Electronic thermostat (FCX-ACT)

Automatic fan speed change

Possibility of automatic fan speed change to ensure gradual modulation of power supplied.

Automatic season changeover

After a check of the input water temperature, the panel automatically positions to winter or summer operation, changing also the thermostat temperature scale.

Automatic on - off

After a check of the input water temperature, the microprocessor starts up or shuts down (to stand-by) the fan (and valve if fitted) in summer or winter operation mode.

Silent operation

The absence of electro-mechanical actuators eliminates the typical clicking noises generated by relays in certain conditions. This fact, combined with the silent ventilation, ensure the outstanding acoustic comfort standards of Aermec fancoils.

Other functions:

AUTOTEST, winter antifreeze check.

Accessories

- **AMP:** Kit for wall/ceiling mounting for versions FCX U and UE.
- **BC:** Auxiliary condensate drip tray.
- **BV:** Single row hot water coil. The accessory is not available for models fitted with a Plasmacluster filter and 4R.
- **DSC4:** Condensate drainage device for use when natural run-off is not possible.
- **PC:** Rear cover panel.
- **RX:** Armoured electrical heating element with safety thermostat. (Need thermostat with el. heater control). The accessory is not available for models fitted with a Plasmacluster filter and 4R.
- **SE:** Manually operated fresh air intake louver.
- **SIT 3-5:** Thermostat interface cards. They allow to set up a fancoils network (max. 10) commanded by a centralised panel (switch or

thermostat).

SIT3: commands the three speeds of the fan and must be installed on each fancoil of the network; it receives the commands from the switch or from the SIT5 card.

SIT5: commands the 3 fan speeds and up to two valves (four-pipe systems); it sends the thermostat commands to the fancoils network.

- **SW:** Probe for the electronic thermostats which permits operation of the unit only with water above 35 °C.

- **SWA:** External probe accessory SWA (length L = 6m). It detects the temperature of the room air if connected to the connector (A) of the FMT20AW panel. The room air temperature probe, incorporated in the panel, is automatically disabled. It detects the temperature of the

water in the system for ventilation consent if connected to the connector (W) of the FMT20AW panel. Two SWA probes can be connected simultaneously to the FMT20AW panel.

- **VCF:** Kit comprising motorized 3 way valve, unions and copper pipes. For 4, 3-row and 1-row coils (BV). Combine the SW3 probe with FCX ACT, too. Versions with 230V and 24V~50Hz power supply.
- **VCFD:** Kit comprising motorized 2 way valve, unions and copper pipes. For 4, 3-row and 1-row coils (BV). Combine the SW3 probe with FCX ACT, too. Versions with 230V and 24V~50Hz power supply.
- **ZX:** Feet for floor-standing installations for A-AS-ACB-ACT-APC models.
- **Control panels:** The control panels are described in a separate document.

Power supply = 230V ~ 50Hz.

(E) = EUROVENT certified performance

Performance values refer to the following conditions:

♪ Sound pressure measured in an 85 m³ semi-reverberant test chamber with reverberation time Tr = 0.5s.

■ Cooling:

- room air temperature 27 °C D.B., 19 °C W.B.;
- water inlet temperature 7 °C; maximum speed;
- Δt water 5 °C;
- for medium and low speed, water flow rate remains same as at maximum speed.

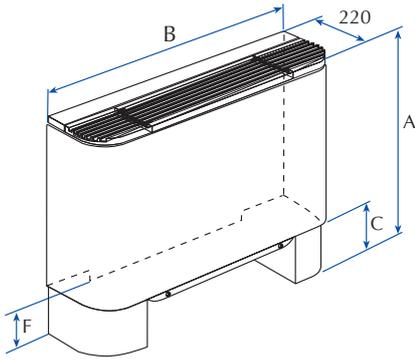

■ Heating:

- room air temperature 20 °C;
- maximum speed:
- water inlet temperature 70 °C; Δt water 10 °C;
- medium and low speed:
- water inlet temperature 70 °C;
- water flow rate remains same as at maximum speed.

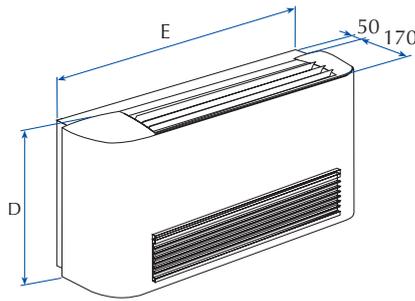

■ Heating*:

- room air temperature 20 °C;
- maximum speed:
- water inlet temperature 50 °C;
- water flow rate same as in cooling operation.
