

Big Foot Rapid Walkway

Safe access for on going maintenance and inspection of plant and services

Typical Application

The Big Foot Rapid Walkway is ideal for establishing clear, safe pathways around installations on a flat roof. It offers a secure route for service engineers to gain access to plant and for managing the flow of other personnel. The metalwork is galvanised to withstand the year-round elements on a roof, and the gritted top to the Walkway grating provides a permanent non-slip surface in any weather. The Big Foot Rapid Walkway system utilises Fix-it Foot feet.

This beautifully simple Walkway system is supported on recycled rubber blocks. Rapid Walkway systems are supplied from stock and are quick and easy to install on site.

Custom Walkway

Big Foot Systems will be happy to specify a Walkway designed specially to meet your needs. All you need to do is provide accurate drawings of the flat roof and its existing installations and we will supply you with a planned layout and quote.
