Note:

The phrase "Wired remote controller" in this operation manual refers only to the PAR-33MAA. If you need any information for the other remote controller, please refer to the instruction book included in this box.

1. Safety Precautions

- ▶ Before installing the unit, make sure you read all the "Safety Precautions".
- ▶ The "Safety Precautions" provide very important points regarding safety. Make sure you follow them.
- ▶ Please report to or take consent by the supply authority before connection to the system.

MEANINGS OF SYMBOLS DISPLAYED ON THE UNIT

	WARNING (Risk of fire)This mark is for R32 refrigerant only. Refrigerant type is written on nameplate of outdoor unit. In case that refrigerant type is R32, this unit uses a flammable refrigerant. If refrigerant leaks and comes in contact with fire or heating part, it will create harmful gas and there is risk of fire.						
	Read the OPERAT	ION MANUAL carefully before operation.					
	Service personnel	are required to carefully read the OPERATION MANUAL and INSTALLATION MANUAL before operation.					
i	Further information	is available in the OPERATION MANUAL, INSTALLATION MANUAL, and the like.					

Symbols used in the text

A Warning:

Describes precautions that should be observed to prevent danger of injury or death to the user.

▲ Caution:

Describes precautions that should be observed to prevent damage to the unit.

A Warning:

- There appliances are not accessible to the general public.
- The unit must not be installed by the user. Ask the dealer or an authorized company to install the unit. If the unit is installed improperly, water leakage, electric shock or fire may result.
- · Do not stand on, or place any items on the unit.
- Do not splash water over the unit and do not touch the unit with wet hands. An electric shock may result.
- Do not spray combustible gas close to the unit. Fire may result.
- Do not place a gas heater or any other open-flame appliance where it will be exposed to the air discharged from the unit. Incomplete combustion may result.
- Do not remove the front panel or the fan guard from the outdoor unit when it is running.
- When you notice exceptionally abnormal noise or vibration, stop operation, turn off the power switch, and contact your dealer.
- Never insert fingers, sticks etc. into the intakes or outlets.
- If you detect odd smells, stop using the unit, turn off the power switch and consult your dealer. Otherwise, a breakdown, electric shock or fire may result.
- This air conditioner is NOT intended for use by children or infirm persons without supervision.
- Young children must be supervised to ensure that they do not play with the air conditioner.
- If the refrigeration gas blows out or leaks, stop the operation of the air conditioner, thoroughly ventilate the room, and contact your dealer.
- This appliance is intended to be used by expert or trained users in shops, in light industry and on farms, or for commercial use by lay persons.

 This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Symbols used in the illustrations

 $(\underline{\downarrow})$: Indicates a part which must be grounded.

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliances.
- When installing or relocating, or servicing the air conditioner, use only the specified refrigerant written on outdoor unit to charge the refrigerant lines. Do not mix it with any other refrigerant and do not allow air to remain in the lines.

If air is mixed with the refrigerant, then it can be the cause of abnormal high pressure in the refrigerant line, and may result in an explosion and other hazards.

The use of any refrigerant other than that specified for the system will cause mechanical failure or system malfunction or unit breakdown. In the worst case, this could lead to a serious impediment to securing product safety.

 This unit should be installed in rooms which exceed the floor space specified in outdoor unit installation manual.
 Refer to outdoor unit installation manual.

1. Safety Precautions

- Do not use means to accelerate the defrosting process or to clean, other than those recommended by the manufacturer.
- The appliance shall be stored in a room without continuously operating ignition sources (for example: open flames, an operating gas appliance or an operating electric heater).

△ Caution:

- Do not use any sharp object to push the buttons, as this may damage the remote controller.
- Never block or cover the indoor or outdoor unit's intakes or outlets.

Wired Remote Controller

Controller interface

① [ON/OFF] button

Press to turn ON/OFF the indoor unit.

2 [SELECT] button

Press to save the setting.

3 [RETURN] button

Press to return to the previous screen.

④ [MENU] button

Press to bring up the Main menu.

5 Backlit LCD

Operation settings will appear.

When the backlight is off, pressing any button turns the backlight on and it will stay lit for a certain period of time depending on the screen.

When the backlight is off, pressing any button turns the backlight on and does not perform its function. (except for the [ON/OFF] button)

- Do not pierce or burn.
- · Be aware that refrigerants may not contain an odour.

Disposing of the unit

When you need to dispose of the unit, consult your dealer.

The functions of the function buttons change depending on the screen.

Refer to the button function guide that appears at the bottom of the LCD for the functions they serve on a given screen.

When the system is centrally controlled, the button function guide that corresponds to the locked button will not appear.

6 ON/OFF lamp

This lamp lights up in green while the unit is in operation. It blinks while the remote controller is starting up or when there is an error.

⑦ Function button [F1]

Main display: Press to change the operation mode. Main menu: Press to move the cursor down.

8 Function button [F2]

Main display: Press to decrease temperature. Main menu: Press to move the cursor up.

9 Function button [F3]

Main display: Press to increase temperature. Main menu: Press to go to the previous page.

Function button [F4]

Main display: Press to change the fan speed. Main menu: Press to go to the next page.

2. Parts Names

Display

The main display can be displayed in two different modes: "Full" and "Basic". The factory setting is "Full". To switch to the "Basic" mode, change the setting on the Main display setting. (Refer to operation manual included with remote controller.)

<Full mode>

* All icons are displayed for explanation.

Wireless Remote-Controller

2. Parts Names

Notes (Only for wireless remote controller):

- When using the wireless remote controller, point it towards the receiver on the indoor unit.
- If the remote controller is operated within approximately 3 minutes after power is supplied to the indoor unit, the indoor unit may beep twice as the unit is performing the initial automatic check.
- The indoor unit beeps to confirm that the signal transmitted from the remote controller has been received. Signals can be received up to approximately 7 meters in a direct line from the indoor unit in an area 45° to the left and right of the unit. However, illumination such as fluorescent lights and strong light can affect the ability of the indoor unit to receive signals.
- If the operation lamp near the receiver on the indoor unit is blinking, the unit needs to be inspected. Consult your dealer for service.
- Handle the remote controller carefully! Do not drop the remote controller or subject it to strong shocks. In addition, do not get the remote controller wet or leave it in a location with high humidity.
- To avoid misplacing the remote controller, install the holder included with the remote controller on a wall and be sure to always place the remote controller in the holder after use.
- If the indoor unit beeps 4 times when you are using the wireless remote controller, switch the auto mode setting to the AUTO (single set point) mode or AUTO (dual set point) mode. For details, refer to the included Notice (A5 sheet) or the Installation Manual of wireless remote

Battery installation/replacement

1. Remove the top cover, insert two LR6 AA batteries, and then install the top cover.

2. Press the Reset button.

Outdoor unit

controller.

About the operation method, refer to the operation manual that comes with each remote controller.

3.1. Turning ON/OFF

[ON]

Press the [ON/OFF] button. The ON/OFF lamp will light up in green, and the operation will start.

Press the [ON/OFF] button again. The ON/OFF lamp will come off, and the operation will stop.

Note:

Even if you press the ON/OFF button immediately after shutting down the operation is progress, the air conditioner will not start for about 3 minutes. This is to prevent the internal components from being damaged.

Operation status memory

	Remote controller setting
Operation mode	Operation mode before the power was turned off
Preset temperature	Preset temperature before the power was turned off
Fan speed	Fan speed before the power was turned off

Settable preset temperature range

Operation mode	Preset temperature range
Cool/Dry	19 – 30 °C
Heat	17 – 28 °C
Auto	19 – 28 °C
Fan/Ventilation	Not settable

3.2. Mode Selection

Press the [F1] button to go through the operation modes in the order of "Cool", "Dry", "Fan", "Auto", and "Heat". Select the desired operation mode.

 Operation modes that are not available to the connected outdoor unit models will not appear on the display.

What the blinking mode icon means

The mode icon will blink when other indoor units in the same refrigerant system (connected to the same outdoor unit) are already operated in a different mode. In this case, the rest of the unit in the same group can only be operated in the same mode.

Automatic operation

<Single set point>

- According to a set temperature, cooling operation starts if the room temperature is too hot and heating operation starts if the room temperature is too cold.
- During automatic operation, if the room temperature changes and remains 2.0 °C or more above the set temperature for 15 minutes, the air conditioner switches to cool mode. In the same way, if the room temperature remains 2.0 °C or more below the set temperature for 15 minutes, the air conditioner switches to heat mode.

<Dual set point> Note:

• This function cannot be set depending on the outdoor unit to be connected.

When the operation mode is set to the Auto (dual set point) mode, two preset temperatures (one each for cooling and heating) can be set. Depending on the room temperature, indoor unit will automatically operate in either the Cool or Heat mode and keep the room temperature within the preset range.

For details on how to operate, refer to manual of remote controller.

3.3. Temperature setting <Cool, Dry, Heat, and Auto>

Press the [F2] button to decrease the preset temperature, and press the [F3] button to increase.

- Refer to the table on page 7 for the settable temperature range for different operation modes.
- Preset temperature range cannot be set for Fan/Ventilation operation.
- Preset temperature will be displayed either in Centigrade in 0.5- or 1-degree increments, or in Fahrenheit, depending on the indoor unit model and the display mode setting on the remote controller.

3.4. Fan speed setting

Press the [F4] button to go through the fan speeds in the following order.

· The available fan speeds depend on the models of connected indoor units.

Notes:

- The number of available fan speeds depends on the type of unit • connected.
- In the following cases, the actual fan speed generated by the unit will differ from the speed shown the remote controller display. 1.While the display is in "STAND BY" or "DEFROST" states.
 - 2.When the temperature of the heat exchanger is low in the heating mode.
 - (e.g. immediately after heating operation starts)
 - 3.In HEAT mode, when room temperature is higher than the temperature setting.
 - 4.In COOL mode, when room temperature is lower than the temperature setting.
 - 5. When the unit is in DRY mode.

3.5. Airflow direction setting

3.5.1 Navigating through the Main menu <Accessing the Main menu>

The screen to set the selected item

Press the [RETURN] button to exit the Main menu and return to the

If no buttons are touched for 10 minutes, the screen will automatically return to the Main display. Any settings that have not been saved will

The message at left will appear if the user selects a function not supported by the corresponding

3.5.2 Vane·Vent. (Lossnay) <Accessing the menu>

<Vane setting>

<Vent. setting>

<Returning to the Main menu>

Notes:

- During swing operation, the directional indication on the screen does not change in sync with the directional vanes on the unit.
- Available directions depend on the type of unit connected.In the following cases, the actual air direction will differ from the
 - direction indicated on the remote controller display.
 - 1. While the display is in "STAND BY" or "DEFROST" states.
 - 2. Immediately after starting heat mode (while the system is waiting for the mode change to take effect).
 - 3. In heat mode, when room temperature is higher than the temperature setting.

< How to set the fixed up/down air direction >

For PLA-EA series, only the particular outlet can be fixed to certain direction with the procedures below. Once fixed, only the set outlet is fixed every time air conditioner is turned on. (Other outlets follow UP/DOWN air direction setting of remote controller.)

Note:

Select "Vane-Louver-Vent.

[SELECT] button.

Explanation of word

- "Refrigerant address No." and "Unit No." are the numbers given to each air conditioner.
- "Outlet No." is the number given to each outlet of air conditioner. (Refer to the illustration below.)
- "Up/Down air direction" is the direction (angle) to fix.

Outlet No. 4

Note:

Outlet No. 1

The outlet No. is indicated by the number of grooves on both ends of each air outlet. Set the air direction while checking the information shown on the remote controller display.

Air outlet identification marks

Confirmation procedure (wired remote controller)

- ① First, confirm by setting "Ref. address" to 0 and "Unit No." to 1.
 - Move the cursor to "Ref. address" or "Unit No." with the [F1] button to select.
 - Select the refrigerant address and the unit number for the units to whose vanes are to be fixed, with the [F2] or [F3] button, and press the [SELECT] button.
- Ref. address: Refrigerant address
 Unit No.: 1, 2, 3, 4
 Press the [F4] button to confirm
- the unit.
- ② Change the "Unit No." in order and check each unit.
- Press the [F1] button to select
 "Unit No.".

Press the [F2] or [F3] button to change the "Unit No." to the unit that you want to check, and then press the [F4] button.

- After pressing the [F4] button, wait approximately 15 seconds, and then check the current state of the air conditioner.
- \rightarrow The vane is pointing downward. \rightarrow This air conditioner is displayed on the remote controller.

 → All outlets are closed. → Press the [RETURN] button and continue the operation from the beginning.
 → The messages shown to the left are displayed. → The target device does not exist at this refrigerant address.

- Press the [RETURN] button to return to the initial screen.
- ③ Change the "Ref. address" to the next number.
- Refer to step ① to change the "Ref. address" and continue with the confirmation.

3.6. 3D i-see Sensor setting

Note:

This function cannot be set depending on the outdoor unit to be connected.

3.6.1 3D i-see Sensor setting

Maintenance menu Auto descending panel Manual vane angle

▶ 3D i-See sensor

F2

F3

F4

Main menu: ▼ Cursor ▲

F1

① Select "Maintenance" from the Main menu (refer to page 8), and press the [SELECT] button.

② Select "3D i-See sensor" with the [F1] or [F2] button, and press the [SELECT] button.

- ③ Select the desired menu with the [F1] or [F2] button, and press the [SELECT] button.
- Air distribution Select the airflow direction control method when the airflow direction is set to "Auto".
- Energy saving option Operates the energy-save mode according to whether persons are detected in the room by the 3D i-see Sensor.
- Seasonal airflow When the thermostat turns off, the fan and the vanes operate according to the control settings.
- Move the cursor to "Ref. address" or "Unit No." with the [F1] button to select.
 - Select the refrigerant address and the unit number for the units to whose vanes are to be fixed, with the [F2] or [F3] button, and press the [SELECT] button.
- Ref. address: Refrigerant address
- Unit No.: 1, 2, 3, 4 Press the [F4] button to confirm the unit.

The vane of only the target indoor unit is pointing downward.

② Select the menu with the [F4] button.

 $\begin{array}{l} \text{Default} \rightarrow \text{Area} \rightarrow \text{Direct/Indirect} \\ \rightarrow \text{Default} \ldots \end{array}$

Default: The vanes move the same as during normal operation.

"Area"*: The vanes move to the down airflow direction toward areas with a high floor temperature during cooling mode and toward areas with a low floor temperature during heating mode. Otherwise, the vanes move to the horizontal airflow direction.

"Direct/Indirect"*: The vanes automatically move relative to the areas where persons are detected.

The vanes operate as indicated in the following table.

In order to enable this function, the airflow direction must be set to "Auto".

	Vane setting Direct Indirect					
Cooling	horizontal → swing	keep horizontal				
Heating	keep downward	downward \rightarrow horizontal				

③ When Direct/Indirect is selected, set each air outlet. Select the air outlet with the [F1]

or [F2] button, and change the setting with the [F4] button. After changing the settings for all of the air outlets, press the [SE-LECT] button to save the settings.

■ i-see button (Wireless remote controller)

CO .S	\$@1
СГОСК	12:34

① Each time \square is pressed during operation, the setting changes in the following order: OFF → Direct → Indirect.

Display	2111		7						
Setting	OFF	Direct	Indirect						

When the setting is changed from OFF to Direct or Indirect, the vane setting changes to "Auto". This setting is applied collectively to all of the vanes.

3.6.3 Energy saving option

 Select the desired menu with the [F1] or [F2] button.

No occupancy energy save If there are no persons in the room for 60 minutes or more, energysaving operation equal to 2 °C is performed.

Room occupancy energy save If the occupancy rate decreases to approximately 30% of the maximum occupancy rate, energysaving operation equal to 1 °C is performed.

No occupancy Auto-OFF If there are no persons in the room for the set amount of time (60–180 minutes), the operation is automatically stopped.

② When No occupancy energy save or Room occupancy energy save is selected

Select the setting with the [F4] button. OFF \rightarrow Cooling only \rightarrow Heating

only \rightarrow Cooling/Heating \rightarrow OFF...

After changing the setting, press the [SELECT] button to save the setting.

OFF: The function is disabled. Cooling only: The function is enabled only during cooling mode. Heating only: The function is enabled only during heating mode. Cooling/Heating: The function is enabled during both cooling mode and heating mode.

③ When No occupancy Auto-OFF is selected Set the time with the [F3] or [F4] button.

---: The setting is disabled (the operation will not stop automatically). 60–180: The time can be set in 10-minute increments.

Shut down by No Occupancy Auto-OFF 31/Dec AM12:59

 (\mathbf{I})

④ The message at left will appear if the operation was stopped automatically by the No occupancy Auto-OFF setting.

3.6.4 Seasonal airflow function

 ③ Select the setting with the [F4] button.
 OFF → Cooling only → Heating

only \rightarrow Cooling/Heating \rightarrow OFF...

After changing the setting, press the [SELECT] button to save the setting.

OFF: The function is disabled. Cooling only: When the thermostat turns off during cooling mode, the vanes move up and down. Heating only: When the thermostat turns off during heating mode, the vanes move to the horizontal airflow direction to circulate the air. Cooling/Heating: The function is enabled during both cooling mode and heating mode.

* In order to enable this function, the airflow direction must be set to "Auto".

Notes:

- Any person at the following places cannot be detected.
- Along the wall on which the air conditioner is installed
- Directly under the air conditioner
- Where any obstacle, such as furniture, is between the person and the air conditioner
- A person may not be detected in the following situations.
- Room temperature is high.
- A person wears heavy clothes and his/her skin is not exposed.
- A heating element of which temperature changes significantly is present.
- Some heat sources, such as a small child or pet, may not be sensed.
- A heat source does not move for a long time.

The 3D i-see Sensor operates once approximately every 3 minutes to measure the floor temperature and detect persons in the room.

- The intermittent operating sound is a normal sound produced when the 3D i-see Sensor is moving.
- When MA Remote Controller is used to control multiple refrigerant systems, No occupancy Auto-OFF cannot be used.

3.7. Ventilation

- The following 2 patterns of operation is available.
 Run the ventilator together with indoor unit.
- Run the ventilator independently.
- Notes: (for wireless remote controller)
- Running the ventilator independently is not available.
- No indication on the remote controller.

4. Timer

Timer functions are different by each remote controller.

For details on how to operate the remote controller, refer to the appropriate operation manual included with each remote controller.

Fig. 2

on and off times and the set temperature.

Weekly schedule (Wireless remote controller)

- <Editing mode> 1. Switching to the editing mode
- Dress the FDIT button when the up
 - O Press the EDIT button when the unit is operating or stopped.
- SET blinks. (Fig. 1) 2. Selecting the setting pattern
 - \bigcirc Press the 1-4 button to select the setting pattern number.
- Each time the <u>1~4</u> button is pressed, the pattern number A changes in the following order: $1 \rightarrow 2 \rightarrow 3 \rightarrow 4$. 3. Selecting the day of the week

The weekly schedule can be set to four operation patterns for each day of the week. The settings include the

- ① Press the DAY button to select the day of the week to set.
- Each time the DAY button is pressed, the day of the week (B) changes in the following order: Mon \rightarrow Tue \rightarrow Wed \rightarrow Thu \rightarrow Fri \rightarrow Sat \rightarrow Sun \rightarrow All days.
- 4. Selecting the operation settings
 - \bigcirc Push the button to select the operation on or off setting. (Fig. 2)
 - ©oN (⊙oFF) is lighted.
 - Each time the \bigcirc button is pressed, the setting changes in the following order: \bigcirc on $\rightarrow \bigcirc$ orf.
 - ② Press the TIME button to select the operation time. (Fig. 3)
 - The operation time blinks.
 - Set the operation time using the velocity buttons.
 - The operation time can be set in 10-minute increments.
 - ③ Push the TEMP button to select the set temperature. (Fig. 4) The set temperature blinks.
 - Set the temperature using the v buttons.
 - When setting the off operation, the temperature cannot be set.
 - When the AUTO (dual set point) mode is enabled, press the TEMP button to switch between the upper limit © and the lower limit ©. (Fig. 5)
- ④ By pressing the DELETE button, the pattern number settings for the displayed day of the week are deleted.
- (5) Repeat steps 2–4 to select the settings for each day of the week.

<Transmitting the settings>

Point the transmission area of the wireless remote controller towards the receiver on the indoor unit and operate the controller. Confirm that the indoor unit beeps 7 times.

Press the SET button.

<Enabling the weekly schedule>

Press the **DNOFF** button.

- The weekly schedule operates when WEEKLY is on.
- The weekly schedule does not function when the On/Off timer is enabled.
- The weekly schedule operates when all of the On/Off timer settings have been executed.

For LOSSNAY combination

5. Emergency Operation for Wireless Remote-controller

When the remote controller cannot be used

When the batteries of the remote controller run out or the remote controller malfunctions, the emergency operation can be done using the emergency buttons on the grille.

- B Operation lamp
- © Emergency operation cooling switch
- D Emergency operation heating switch
- © Receiver

Starting operation

- To operate the cooling mode, press the the button I for more than 2 seconds.
- To operate the heating mode, press the \circlearrowright button for more than 2 seconds.
- Lighting of the Operation lamp

 B means the start of operation.

Notes:

• Details of emergency mode are as shown below. Details of EMERGENCY MODE are as shown below.

Operation mode	COOL	HEAT
Set temperature	24°C	24°C
Fan speed	High	High
Airflow direction	Horizontal	Downward

Stopping operation

To stop operation, press the th button ^C or the th button ^D for more than 2 seconds.

6. Care and Cleaning

Filter information

.

will appear on the Main display in the Full mode when it is time to clean the filters.

Wash, clean, or replace the filters when this sign appears. Refer to the indoor unit Instructions Manual for details.

. . .

Select "Filter information" from the Main menu (refer to page 8), and press the [SELECT] button.

Select "OK" with the [F4] button.

A confirmation screen will appear.

- Navigating through the screens
- To go back to the Main menu [MENU] button
- To return to the previous screen
- [RETURN] button

Filter information Pr Please clean the filter. Press Reset button after filter cleaning. Main menu: The Reset F1 F2 F3 F4

(I)

Press the [F4] button to reset filter sign. Refer to the indoor unit Instructions

Manual for how to clean the filter.

6. Care and Cleaning

When the **W** is displayed on the Main display in the Full mode, the system is centrally controlled and the filter sign cannot be reset.

If two or more indoor units are connected, filter cleaning timing for each unit may be different, depending on the filter type.

The icon **will** appear when the filter on the main unit is due for cleaning.

When the filter sign is reset, the cumulative operation time of all units will be reset.

The icon **IIII** is scheduled to appear after a certain duration of operation, based on the premise that the indoor units are installed in a space with ordinary air quality. Depending on the air quality, the filter may require more frequent cleaning.

The cumulative time at which filter needs cleaning depends on the model. • This indication is not available for wireless remote controller.

▲ Caution:

Ask authorized people to clean the filter.

Cleaning the filters

- Clean the filters using a vacuum cleaner. If you do not have a vacuum cleaner, tap the filters against a solid object to knock off dirt and dust.
- If the filters are especially dirty, wash them in lukewarm water. Take care
 to rinse off any detergent thoroughly and allow the filters to dry completely
 before putting them back into the unit.

▲ Caution:

- Do not dry the filters in direct sunlight or by using a heat source, such as an electric heater: this may warp them.
- Do not wash the filters in hot water (above 50°C), as this may warp them.
- Make sure that the air filters are always installed. Operating the unit without air filters can cause malfunction.

▲ Caution:

 Before you start cleaning, stop operation and turn OFF the power supply.

7. Trouble Shooting

Having trouble?	Here is the solution. (Unit is operating normally.)
Air conditioner does not heat or cool well.	 Clean the filter. (Airflow is reduced when the filter is dirty or clogged.) Check the temperature adjustment and adjust the set temperature. Make sure that there is plenty of space around the outdoor unit. Is the indoor unit air intake or outlet blocked? Has a door or window been left open?
When heating operation starts, warm air does not blow from the indoor unit soon.	Warm air does not blow until the indoor unit has sufficiently warmed up.
During heating mode, the air conditioner stops before the set room temperature is reached.	When the outdoor temperature is low and the humidity is high, frost may form on the outdoor unit. If this occurs, the outdoor unit performs a defrosting operation. Normal operation should begin after approxi- mately 10 minutes.
During cooling mode, the air conditioner stops when the set room tem- perature is reached.	■ For PLA-EA series, when the set room temperature is reached during cooling mode, the fan operates at the lowest speed.
Airflow direction changes during operation or airflow direction cannot be set.	During heating mode, the vanes automatically move to the horizontal airflow direction when the airflow temperature is low or during defrost- ing mode.
When the airflow direction is changed, the vanes always move up and down past the set position before finally stopping at the position.	When the airflow direction is changed, the vanes move to the set position after detecting the base position.
A flowing water sound or occasional hissing sound is heard.	These sounds can be heard when refrigerant is flowing in the air conditioner or when the refrigerant flow is changing.
A cracking or creaking sound is heard.	These sounds can be heard when parts rub against each due to expansion and contraction from temperature changes.
The room has an unpleasant odor.	The indoor unit draws in air that contains gases produced from the walls, carpeting, and furniture as well as odors trapped in clothing, and then blows this air back into the room.
A white mist or vapor is emitted from the indoor unit.	 If the indoor temperature and the humidity are high, this condition may occur when operation starts. During defrosting mode, cool airflow may blow down and appear like a mist.
Water or vapor is emitted from the outdoor unit.	 During cooling mode, water may form and drip from the cool pipes and joints. During heating mode, water may form and drip from the heat exchanger. During defrosting mode, water on the heat exchanger evaporates and water vapor may be emitted.
" Suprears in the remote controller display.	During central control, " b" appears in the remote controller display and air conditioner operation cannot be started or stopped using the remote controller.

7. Trouble Shooting

Having trouble?	Here is the solution. (Unit is operating normally.)					
When restarting the air conditioner soon after stopping it, it does not operate even though the ON/OFF button is pressed.	 Wait approximately three minutes. (Operation has stopped to protect the air conditioner.) 					
Air conditioner operates without the ON/OFF button being pressed.	 Is the on timer set? Press the ON/OFF button to stop operation. Is the air conditioner connected to a central remote controller? Consult the concerned people who control the air conditioner. Does " " " appear in the remote controller display? Consult the concerned people who control the air conditioner. Has the auto recovery feature from power failures been set? Press the ON/OFF button to stop operation. 					
Air conditioner stops without the ON/OFF button being pressed.	 Is the off timer set? Press the ON/OFF button to restart operation. Is the air conditioner connected to a central remote controller? Consult the concerned people who control the air conditioner. Does " The presence of the people who controller display? Consult the concerned people who control the air conditioner. 					
Remote controller timer operation cannot be set.	Are timer settings invalid? If the timer can be set, of appears in the remote controller display.					
"PLEASE WAIT" appears in the remote controller display.	The initial settings are being performed. Wait approximately 3 minutes.					
An error code appears in the remote controller display.	 The protection devices have operated to protect the air conditioner. Do not attempt to repair this equipment by yourself. Turn off the power switch immediately and consult your dealer. Be sure to provide the dealer with the model name and information that appeared in the remote controller display. 					
Draining water or motor rotation sound is heard. When cooling operation stops, the drain pump operates stops. Wait approximately 5 minutes.						
The vanes do not move or the indoor unit does not respond to input from the wireless remote controller.	The junction wire connectors of the vane motor and signal receiver may not be connected correctly. Have an installer check the connec- tions. (The colors of the male and female sections of the junction wire connectors must match.)					
Noise is louder than specifications.	The indoor operation sound level is affected by the acoustics of the particular room as shown in the following table and will be higher than the noise specification, which was measured in anechoic room.					
	High sound absorbing rooms Normal rooms Low sound absorbing rooms					
	Location examplesBroadcasting studio, music room, etc.Reception room, hotel lobby, etc.Office, hotel room					
	Noise levels 3 to 7 dB 6 to 10 dB 9 to 13 dB					
Nothing appears in the wireless remote controller display, the display is faint, or signals are not received by the indoor unit unless the remote controller is close.	 The batteries are low. Replace the batteries and press the Reset button. If nothing appears even after the batteries are replaced, make sure that the batteries are installed in the correct directions (+, -). 					
The operation lamp near the receiver for the wireless remote controller on the indoor unit is blinking.	 The self diagnosis function has operated to protect the air conditioner. Do not attempt to repair this equipment by yourself. Turn off the power switch immediately and consult your dealer. Be sure to provide the dealer with the model name.
