Mounting and connection

Mounting

The air curtain is installed horizontally with the supply air grille facing downwards as close to the door as possible. A variety of installation options are available; brackets for wall mounting or threaded bars for ceiling mounting.

Design package for an installation with concealed mountings, cables and pipes is available as an option.

For the protection of wider doorways, several units can be mounted next to each other.

Connection

The PC board SIRe is built into the air curtain on delivery and is equipped with modular connectors for easy connection of external components. Read more about the SIRe control system in the "Controls" section.

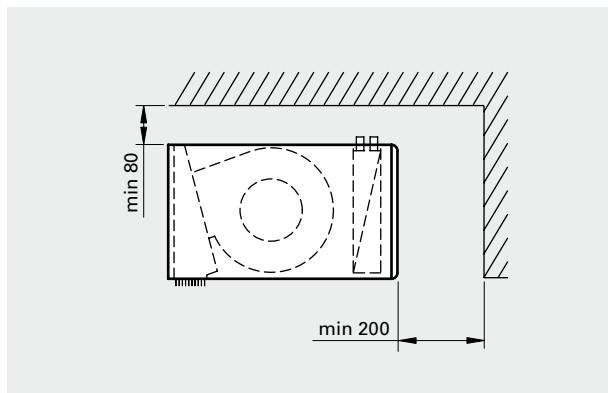

Unit without heating

Operation (230V~) is connected to terminal block in the junction box on top of the unit.

Unit with water heating

Operation (230V~) is connected to terminal block in the junction box on top of the unit.

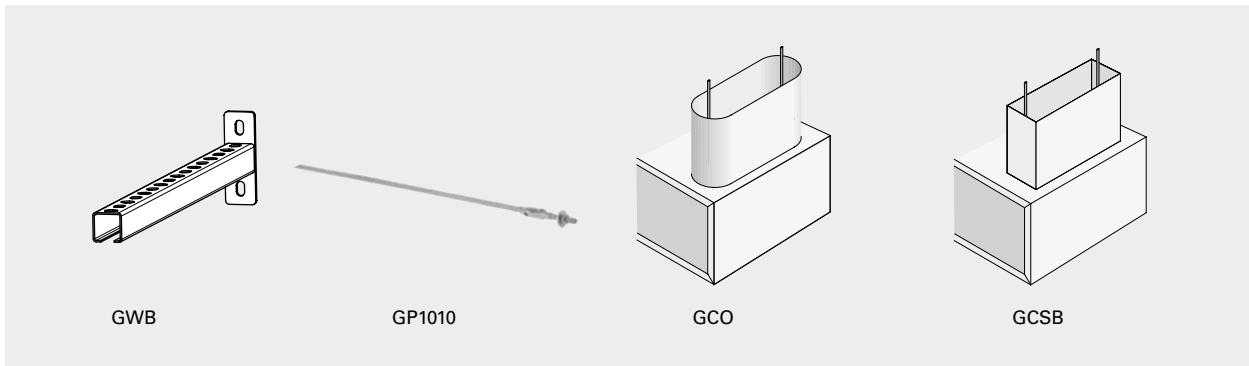

The water coil is connected via connections with dimensions as given in the table (see diagram) on top of the unit.
