

Chiller

# AQWL/AQWH/AQWR 1404 to 2406

Air Cooled Water Chillers  
Cooling Only, Heat Pump  
and Total Heat Recovery  
Engineering Data Manual

380 to 634 kW

418 to 702 kW

# Features & Strength Points

- A more "slim and light" structure, while keeping the features of sturdiness (successfully performed at CESI laboratory, vibration tests in accordance with ASTM standards).
- **Rivets** as joints of the structural elements.
- **Optimization of overall dimensions** for container transport.
- **Symmetric refrigerant circuit** configuration to reduce the length of pipes and consequently the pressure drop in the circuit.
- Standard coils in Al/Cu, arranged in **V configurations** to get a better air distribution and then optimize its performance.
- **Increasing the fin spacing** to reduce fouling problems in cooling mode and increase the drainage-ability in heat pump mode (defrost).
- Units with EER (AQWL complete unit) values higher than 2.9 (Energy efficiency class B) and COP values higher than 3.2 (class A) in heat pump versions.
- All the versions keep the **same configuration of the base units** (same structure, electrical board, compressors and coils). Easy upgrade of the units in stock or on the field.
- **Bi-flow electronic expansion devices** on all units : superheating value controlled by microprocessor, simple and accessible refrigeration system especially for heat pump versions with reduction of brazing points and then possible leakage.
- Optimized coils design (30% refrigerant charge reduction).
- **Compressors box STD on all units** - additional compressor jackets for ELN version (**Easy upgrade of the units in stock**).
- Special version (HSE) for high seasonal efficiency : ESEER higher than 4.5 (15% more than the STD version); and special version (HT) for high operating limits. Both versions are equipped with axial inverter fans of large diameter (electronic brushless type motor).
- Special version (HPF) for high available static pressure (max. 120 Pa) with inverter fans (electronic brushless type motor). Axial fan of large diameter.
- **Hydro kits** with or without buffer tank (750 and 1000 litres) fitted on board of the chiller to perform outstandingly the package solution and the plug & play concept.  
One or two water pumps are available : standard pressure (150 kPa) or high pressure (250 kPa). The water pump has a sound proof box for ELN version.
- For safety purpose when performing service operation, special valves dedicated to R410A are supplied on the refrigerant system. These valves, of 5/16" flare SAE type, are mounted on the liquid line and on the gauges manifold of the unit.
- Range available in **STD** (BLN, LN, ELN), **HSE** (BLN, LN, ELN), **HT** (BLN) and **HPF** (BLN) version.
- **High power hermetic scroll compressors** arranged in tandem and trio configuration.
- **New "dual circuit"** plate heat exchangers at higher efficiency that replace the previous versions.

# Specifications

## General

The new **AQWL/AQWH** units have been designed to operate with **HFC 410A** refrigerant. Both compressors and heat exchangers (plate heat exchanger and coils) have been optimized for this refrigerant.

All the units are available either in **cooling only** or **heat pump** version. Each unit consists of **two independent refrigerant circuits** and is complete with high efficient and high technology components :

- Hermetic **Scroll** compressors with high efficiency and low vibration emissions,
- **Electronic expansion valves**,
- "**True dual**" circuit plate heat exchanger,
- Quiet fans located in externally mounted **nozzle profile housing** generating low sound levels,
- Controller using a **state-of-the-art microprocessor**.

The AQWL units are available in **5 sizes**, from size 1404 to 2406, with a nominal capacity range from **380 to 634 kW**.

The AQWH units are available in **5 sizes**, from size 1404 to 2406, with a nominal capacity range from **360 to 602 kW** in cooling mode and from **418 to 702 kW** in heating mode.

The **STD (Standard)** version of **AQWL/AQWH units** can be supplied with **3 acoustic options** :

- **Base Low Noise (BLN)** : The units are equipped with **delta connected fan motors**. The chillers are not supplied with fan speed controller, but fitted with **compressors box** to reduce the noise emissions.
- **Low Noise (LN)** : The units are equipped with **star connected fan motors**. The chillers are not supplied with fan speed controller, but fitted with **compressors box** to reduce the noise emissions.

- **Extra Low Noise (ELN)** : The units are equipped with **star connected fan motors**, fitted with a speed controller which allows the units to operate with a very low rpm. The chillers are supplied with **compressors box** and **soundproof jackets** on compressors reducing significantly the noise emissions.

In addition to the STD version, the AQWL/AQWH ranges offer **3 more versions** :

- **HSE (High Seasonal Efficiency) version** : It has same equipment as that of the STD version, except that the units are equipped with **special inverter fans**, of large diameter, driven by **EC (electronic brushless type)** motors with **integrated electronic inverter**, to ensure low energy consumption. This version can be supplied with BLN, LN or ELN acoustic options.
- **HT (High Temperature) version** : It has same equipment as HSE units, but the **special inverter fans and motors** have a different regulation. The HT version can be supplied with BLN acoustic option only.
- **HPF (High Pressure Fan) version** : It has same equipment as STD units, except that the units are equipped with **special inverter fans** (same as those used on HSE version, but with a different regulation) driven by **EC motors** with **integrated electronic inverter**. The HPF version provides external static pressure up to **120 Pa**. This version can be supplied with BLN acoustic option only.

Also, **2 heat recovery options** are available :

- **Desuperheater** : All the versions can be supplied with plate type heat exchangers fitted, one on each refrigerant circuit, on the compressor discharge line to recover about **20 % of the total heat** rejected to the condensers.
- **AQWR units** : All the versions of the **cooling only** units can be supplied with a double circuit plate type heat exchanger to recover **100 % of heat rejection** by the condensers. 4-way valves and a field installed control sensor are also provided to ensure the cooling/heat recovery mode changeover.

# Specifications (continued)

## Cabinet and structure

The unit cabinet and structure are made of heavy gauge galvanized steel. All the galvanized steel components are individually painted, with a polyester powder based painting (**RAL 9001**), under a special painting process before the assembly of the unit. This painting system performs and stands a homogeneous protection of the corrosion.

All parts of the structure are totally fastened with non-corrosive screws and bolts.

## Refrigerant circuits

All the units are composed of two independent and separate refrigerant circuits, complete with 4 or 6 hermetic scroll compressors in tandem or trio configuration for each circuit.

Each refrigerant circuit is equipped with liquid line and discharge line shut-off valves, filter-drier with solid core, sight glass and **electronic expansion valve (EXV)**.

The heat pump units (AQWH) are provided with 4-way reversing valves, suction accumulators and liquid receivers on the liquid lines.

The AQWL and AQWH units are both provided with double-circuit plate heat exchangers, of "true dual" type.

The total heat recovery units (AQWR) are supplied with double-circuit water condenser (of plate heat exchanger type), 4-way reversing valves and liquid receivers downstream of the heat recovery condenser.

The functional diagram of each circuit is shown in the section "Refrigerant flow diagram".

## Compressors

Each unit is equipped with 4 or 6 hermetic scroll compressors arranged in tandem or trio configuration per refrigerant circuit.

The compressors are fitted with an electronic control device which ensures protection of compressors against :

- overheating and overloading,
- reversal rotation and phase loss.

All compressors have direct-on-line starting and are mounted on rubber vibration isolators in order to minimize noise and vibration transmission.

## Evaporator

Evaporator is of a "Dual Circuit" brazed stainless steel plate type heat exchanger. It is insulated with a 19 mm thick closed cell polyethylene foam material and is fitted with a film type electric heater on the external surface to prevent the unit from freezing at a low temperature (down to -18 °C) when the unit is off.

Water connections of heat exchanger are of a 3" Victaulic type for all units. Each unit is provided with additional 4" fittings for hydraulic connections between plate heat exchanger and plant.

## Condenser coils

The condenser coils are made of seamless copper tubes, arranged in staggered rows, mechanically expanded into corrugated aluminum fins.

## Condenser fans

For each size, all versions keep the same number of fans.

Large diameter, direct drive axial type fans with asynchronous three-phase motors are used in all acoustic versions (BLN, LN & ELN) of AQWL/AQWH/ AQWR 1404-2406 STD units.

Special inverter fans with electronic brushless type motors are used in AQWL/ AQWH/AQWR HSE, HPF and HT units.

On high pressure fans of HPF units, the external static pressure ( $\leq 120$  Pa) can be adjusted on site to match the customer demand directly from the electronic control panel of the unit.

Fans are equipped with externally mounted nozzle profile housing which generates low sound levels.

## Fan speed control

The airflow is controlled in order to operate at a low ambient temperature.

On standard unit equipped with axial fans, the air flow control is :

- step type for BLN and LN versions without fan speed controls, achieved by switching off some fans of each circuit in function of condensing pressure corrected by external temperature.
- stepless type for ELN version, achieved by an electronic fan speed control, supplied as standard, in function of condensing pressure.

The pressure actuated stepless type fan speed controller can be supplied as optional on BLN and LN versions. It allows the units to operate in cooling mode at ambient temperature down to -18 °C.

On HSE and HPF units with electronic axial fans, the pressure actuated stepless type fan speed control is supplied as standard, because these electronic fans are already equipped with an integrated fan speed control (fan speed range : 50 to 1200 rpm; ambient temperature limit : -18 °C (in cooling mode only)).

## Electrical board

The electrical board is located in a metal case arranged inside the unit and protected by an external horizontally pivoted panel. The metal case has an IP54 protection rating and is complete with grilles for natural air ventilation.

## Electronic control

The units are supplied with the new microprocessor-based electronic control and management system ensuring the following functions :

- Management of the operation of compressors :
  - a) Power on/off
  - b) Anticycle management
  - c) Tandem or trio unloading for high pressure or high compressor pressure ratio (integrated inside the curves of compressor operating limits).
- Chilled and hot water temperature regulation (control option on inlet water temperature RWT (P+I type) or outlet water temperature LWT (neutral band type) of the evaporator).
- Control of superheating on suction line.
- Evaporator antifreeze protection.
- Heat pump defrost control for automatic operation.
- Management of high and low pressure alarms.
- Management of the asymmetric compressors on the two circuits (tandem and trio).
- Management of the electronic expansion valves by means of EXV controller allowing optimized functions : cooling, heating, start-up and defrost.
- Management of external interlocks.
- Management of the remote control :
  - d) Unit power on/off
  - e) Summary alarm signals

## Specifications (continued)

- Remote signalling, by dry contacts :
  - f) Voltage presence
  - g) Compressors in operation
  - h) Circuit alarm unit
- Management of the hydro kit : start-up of pump, antifreeze heater of external tank.
- Management of the heat recovery mode by means of inlet water temperature sensor at the heat recovery condenser.

The unit controller can also clearly show all control parameters of the machine on the liquid crystal display, such as :

- Display of superheating value.
- Display of the temperature at the evaporator inlet and outlet.
- Display of the ambient air temperature.
- Display of the circuit 1 and circuit 2 discharge pressure and suction pressure.
- Display of the set point.
- Display of opening steps of EEV.
- Display of speed control signal (voltage) of fans.
- Display of the various alarm and operation status :
  - i) Compressor start-up alarm (discharge pressure check)
  - j) Low / High pressure
  - k) Low / High super-heating
  - l) Evaporator antifreeze
  - m) Flow switch signal for lack of water
  - n) Control of the compressor operating hours
  - o) Compressors in operation
  - p) Pump in operation and operating hours
  - q) Thermal protection of compressors
  - r) Thermal protection of fans
  - s) Faulty sensors

## Control and safety devices

Each unit is fitted with the following devices :

### Safety :

- Power disconnect switch with an emergency stop function.
- HP switches (double on each circuit), set to 40.5 bar, automatic reset and manual reset from the control panel.
- Water differential pressure switch on the evaporator, set to 105 mbar (corresponding to about 50 % of the nominal capacity) (AQWL/AQWH only).
- Antifreeze temperature sensor (set to +4 °C) on the evaporator (AQWL/AQWH only).
- Safety valve on the discharge line and the liquide receiver (on AQWH), set to 45 bar.

- Discharge gas temperature protection set to 135 °C, on the discharge line of each Scroll compressor (Danfoss compressors only).

### Control :

- HP and LP transducers (two for each circuit).
- Evaporator water inlet temperature sensor.
- Evaporator water outlet temperature sensor (with an antifreeze function).
- Suction temperature sensor for EXV control.
- Ambient air temperature sensor.
- Coil temperature sensors (AQWL/AQWH only).
- Heat recovery condenser temperature sensor (AQWR only).

## Conformity with standards

The following applies to all the sizes and versions of AQWL/AQWH/AQWR units :

- ✓ Machine Directive : 2006/42/EC
- ✓ Low Voltage Directive : 2006/95/EC
- ✓ Electromagnetic Compatibility Directive : 2004/108/EC
- ✓ Pressure Equipment Directive : 97/23/EC

## Standard equipment

- ✓ Set point timer/clock card.
- ✓ Back light display.
- ✓ Digital pressure and temperature reading kit.
- ✓ High ambient pressure control.
- ✓ Double set point (AQWL/AQWH only).
- ✓ Sequence phase control.
- ✓ Electronic expansion valves.
- ✓ Control circuit transformer 400 V/230 V.
- ✓ Data logger.
- ✓ Power supply single point box.
- ✓ Power supply without neutral.
- ✓ Hour meter.
- ✓ Main switch.
- ✓ Refrigerant R410A.
- ✓ PED approval.
- ✓ Evaporator antifreeze electric heater.
- ✓ Compressor jacket (ELN version only).
- ✓ Compressor box.
- ✓ Water pump acoustic box (ELN version only).
- ✓ Rubber anti-vibration pad.
- ✓ Water differential pressure switch (AQWL/AQWH only).

# Specifications (continued)

## Optional hydro kits

On board hydro kits and remote hydro kits are available.

On board hydro kits can be supplied with or without buffer tank, while remote hydro kits are always supplied with internal tank and pump(s). The HPT models can be used as remote hydro kits for field installation.

The on board hydro kit, located inside the unit, with or without buffer tank, has the following components :

- Single or double pump with low static pressure (150 kPa) or high static pressure (250 kPa),
- Expansion tank,
- Water filter,
- Shut-off valves,
- Safety valve,
- Automatic air vent valve,
- Thermal insulation for pipes and water pump(s),
- Antifreeze electric heater for hydraulic pipes (available on request),
- 750 or 1000-litre buffer tank (if required) with external thermal insulation,
- The water pump(s) is supplied with sound proof box for AQWL/AQWH units in ELN version.

This hydro kit is provided for AQWL/AQWH only.

## Factory-installed options

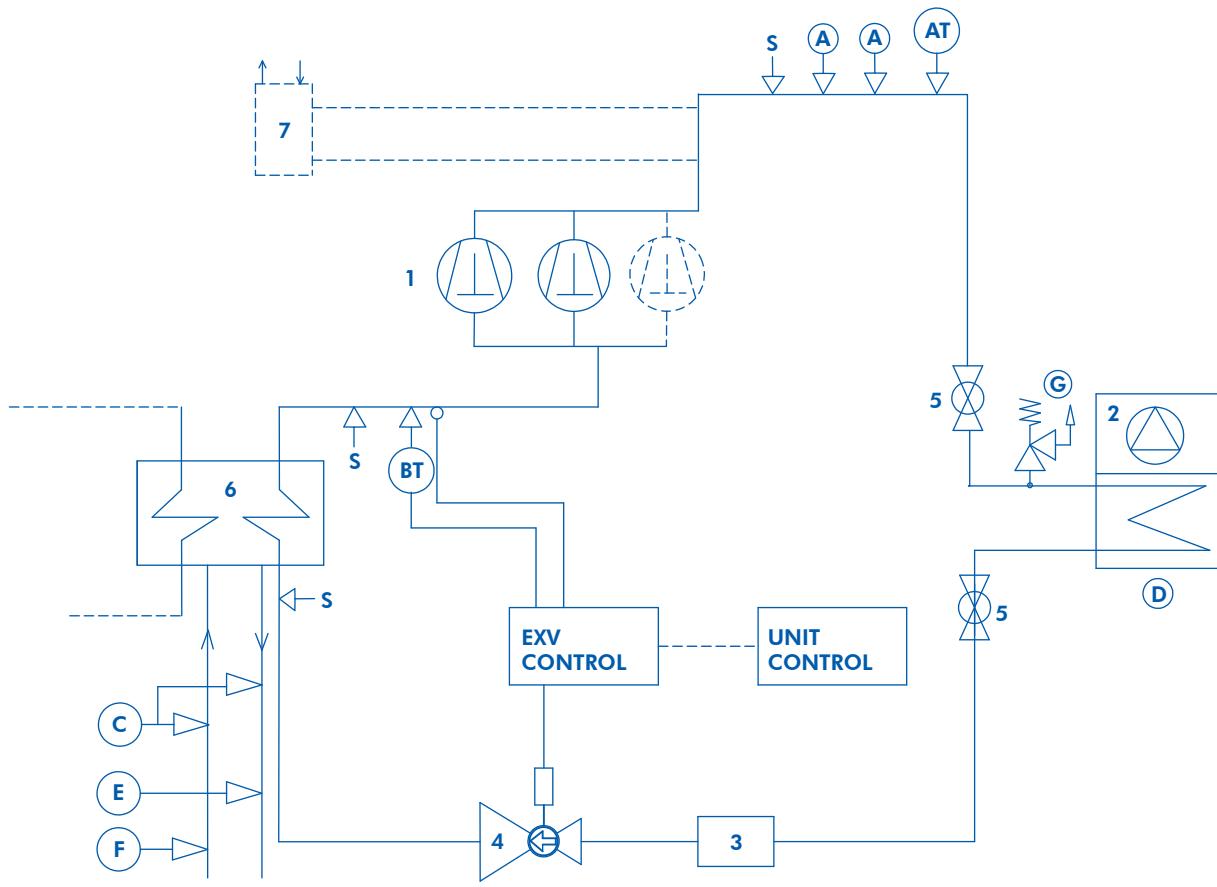

- ✓ ModBus protocol kit for BMS.
- ✓ Lonwork protocol kit for BMS.
- ✓ Bacnet protocol kit for BMS.
- ✓ WEBctrl.
- ✓ Ethernet TCP/IP interface board.
- ✓ Compressors soft starter.
- ✓ Pressure actuated stepless fan speed controller for low ambient operation (-18 °C) (BLN & LN versions).
- ✓ Power factor correction capacitors.
- ✓ Compressors overload protection.
- ✓ GSM.

- ✓ HP & LP manometers.
- ✓ Condenser coils with blue fins treatment.
- ✓ Condenser coils with "Fin Guard Silver" (polyurethane) treatment.
- ✓ Condenser coils with copper fins.
- ✓ High static pressure fans (ESP<120 Pa) for HPF version.
- ✓ Coil guards.
- ✓ Chiller grilles.
- ✓ Compressor jacket.
- ✓ Water pump acoustic box.
- ✓ Total heat recovery (AQWR).
- ✓ Desuperheater.
- ✓ On board hydro kits with or without buffer tank (750 or 1000 litres), 1 or 2 low or high pressure pump(s) and relevant accessories.
- ✓ On board hydro kits with buffer tank (750 or 1000 litres) alone, without pumps.

## Field-installed accessories

- ✓ Remote ON/OFF control.
- ✓ Remote keyboard panel.
- ✓ Master and slaves control, up to 4 units max.
- ✓ Chiller grilles.
- ✓ Spring anti-vibration mounts for basic unit.
- ✓ Spring anti-vibration mounts for unit with copper fins.
- ✓ Spring anti-vibration mounts for internal hydro kit with tank (750 or 1000 litres).
- ✓ Spring anti-vibration mounts for external hydro kit.
- ✓ Flow switch.
- ✓ Pressure switch.
- ✓ Water filter.
- ✓ Remote hydro kits with buffer tank, 1 or 2 low or high pressure pump(s), relevant accessories and with or without tank antifreeze heater.

## Correction Factors

### Fouling factors

EVAPORATOR			CONDENSER		
Fouling factor (m <sup>2</sup> .°C/kW)	Cooling capacity factor	Power input factor	Fouling factor (m <sup>2</sup> .°C/kW)	Cooling capacity factor	Power input factor
0.044	1.000	1.000	0.044	1.000	1.000
0.088	0.987	0.995	0.088	0.987	1.023
0.176	0.964	0.985	0.176	0.955	1.068
0.352	0.915	0.962	0.352	0.910	1.135

### Altitude factors

Altitude (m)	Cooling capacity factor	Power input factor
0	1.000	1.000
600	0.987	1.010
1200	0.973	1.020
1800	0.958	1.029
2400	0.943	1.038

## System Water Volume

The minimum system water volume is calculated using **the minimum compressor running time (1.5 minute)** for scroll compressor) and the **lower capacity step** (only one compressor running among the six compressors installed) :

$$V = \frac{P \times t}{(n \times 25 \times \Delta T)}$$

Where **V** : Water volume (litre)  
**P** : Unit total cooling capacity (W)  
**n** : Number of compressor steps  
**t** : Compressor minimum running time (minute)  
**ΔT** : Evaporator temperature difference (°C)

With  $t = 1.5$  minute,  $\Delta T = 5$  °C and  $n = 6$ , the minimum system water volume is about **V = 2.4 litres/kW**.

**Notes :** - LWT : Leaving water temperature.  
- Power input data are given for compressors only.

## Evaporator Water Pressure Drop Curves - AQWL/AQWH Units

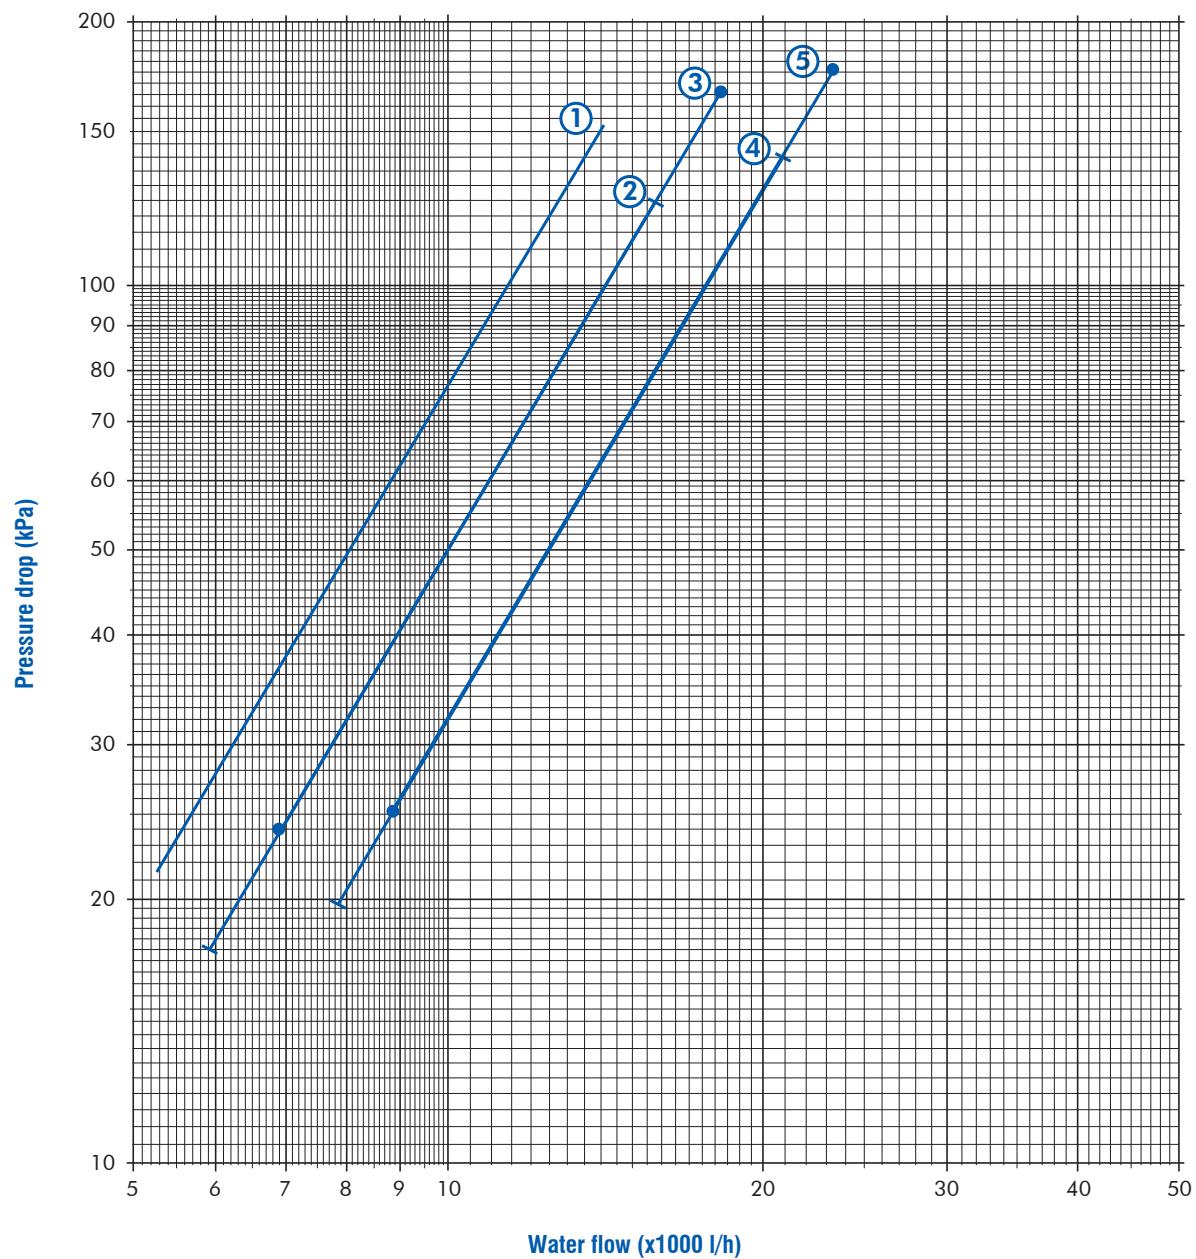

Curve n°	Unit model	Q <sub>nom</sub> (l/h)	Q <sub>max</sub> (l/h)	Q <sub>min</sub> (l/h)	ΔP <sub>nom</sub> (kPa)	ΔP <sub>max</sub> (kPa)	ΔP <sub>min</sub> (kPa)
1	1404	65360	108933	40850	50.4	140.0	19.7
2	1604	72739	121231	45462	50.3	139.8	19.7
3	1806	85312	142187	53320	55.0	152.8	21.5
4	2106	96664	161107	60415	70.6	196.2	27.6
5	2406	109117	181861	68198	76.4	212.3	29.9

## Total Heat Recovery Condenser Water Pressure Drop Curves - AQWR Units

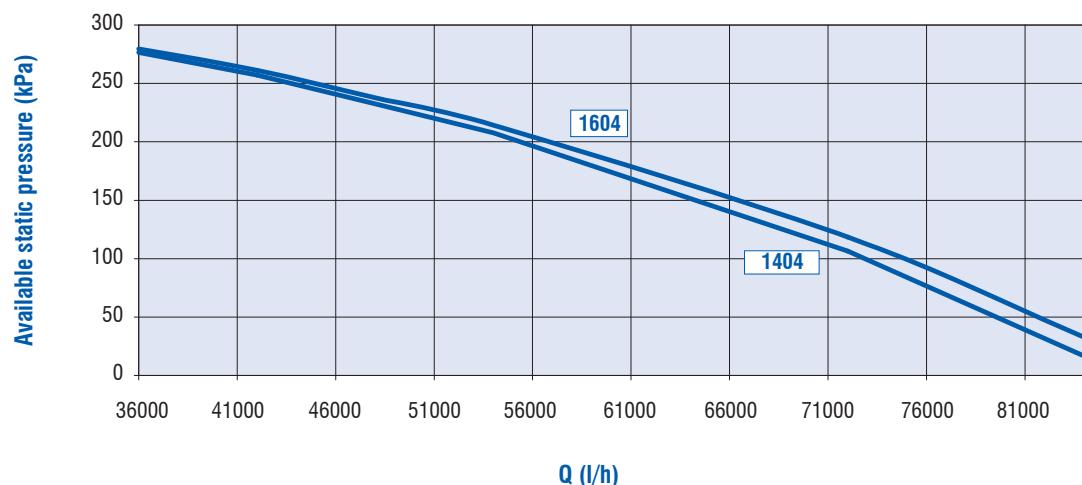

## Desuperheater Water Pressure Drop Curves - AQWL/AQWH Units

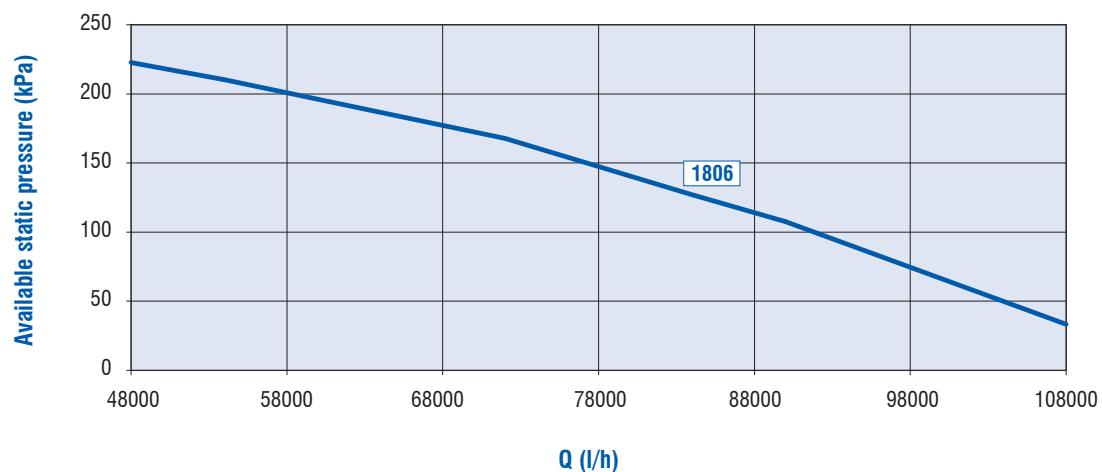

**Note :** Flow rate refers to one condenser only.

## Circulating Pump Curves

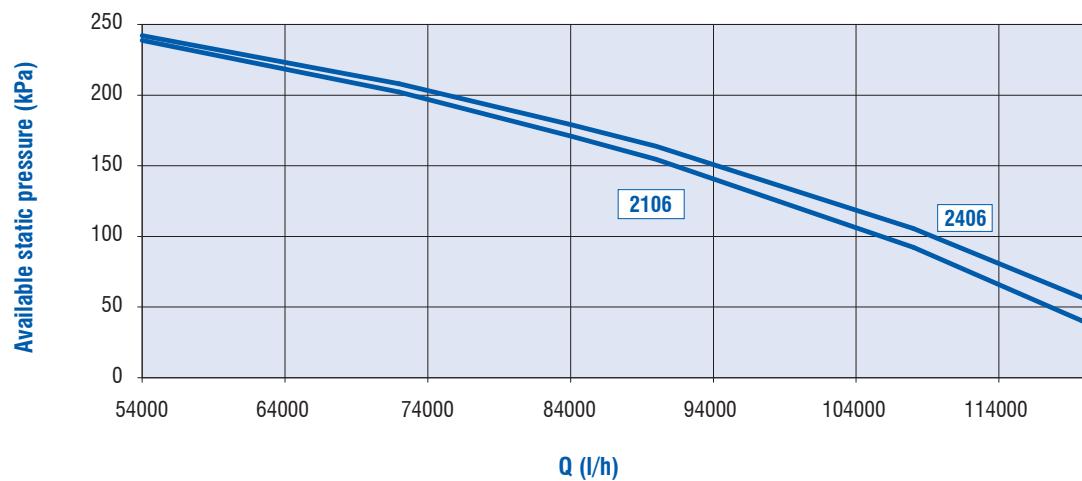

### Pump static head pressure (low head pumps) - Models 1404 & 1604

### Pump static head pressure (low head pumps) - Model 1806

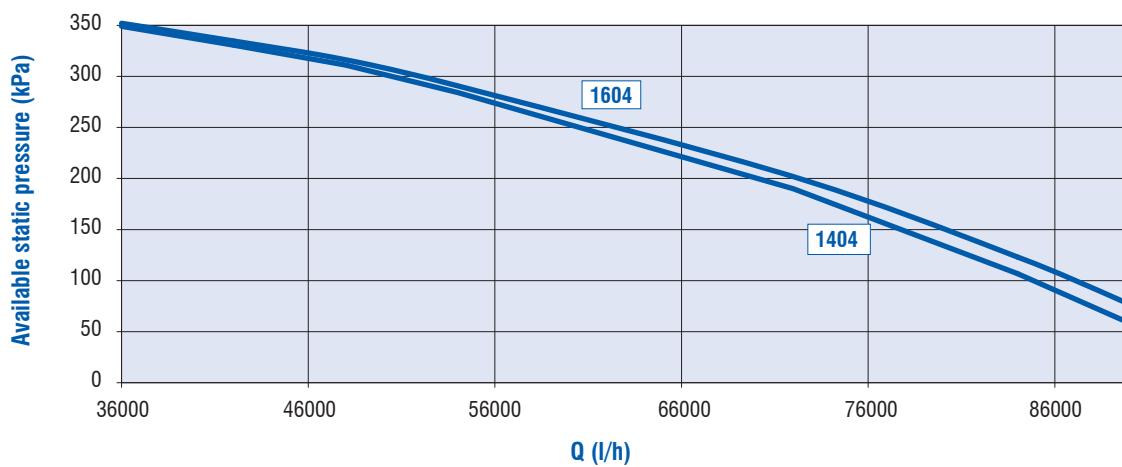

### Pump static head pressure (low head pumps) - Models 2106 & 2406

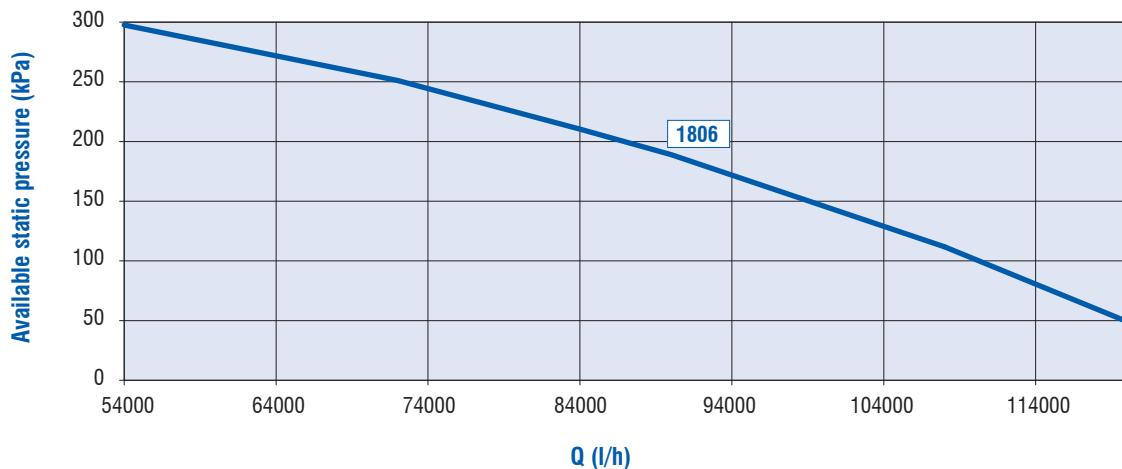

## Circulating Pump Curves (continued)

### Pump static head pressure (high head pumps) - Models 1404 & 1604

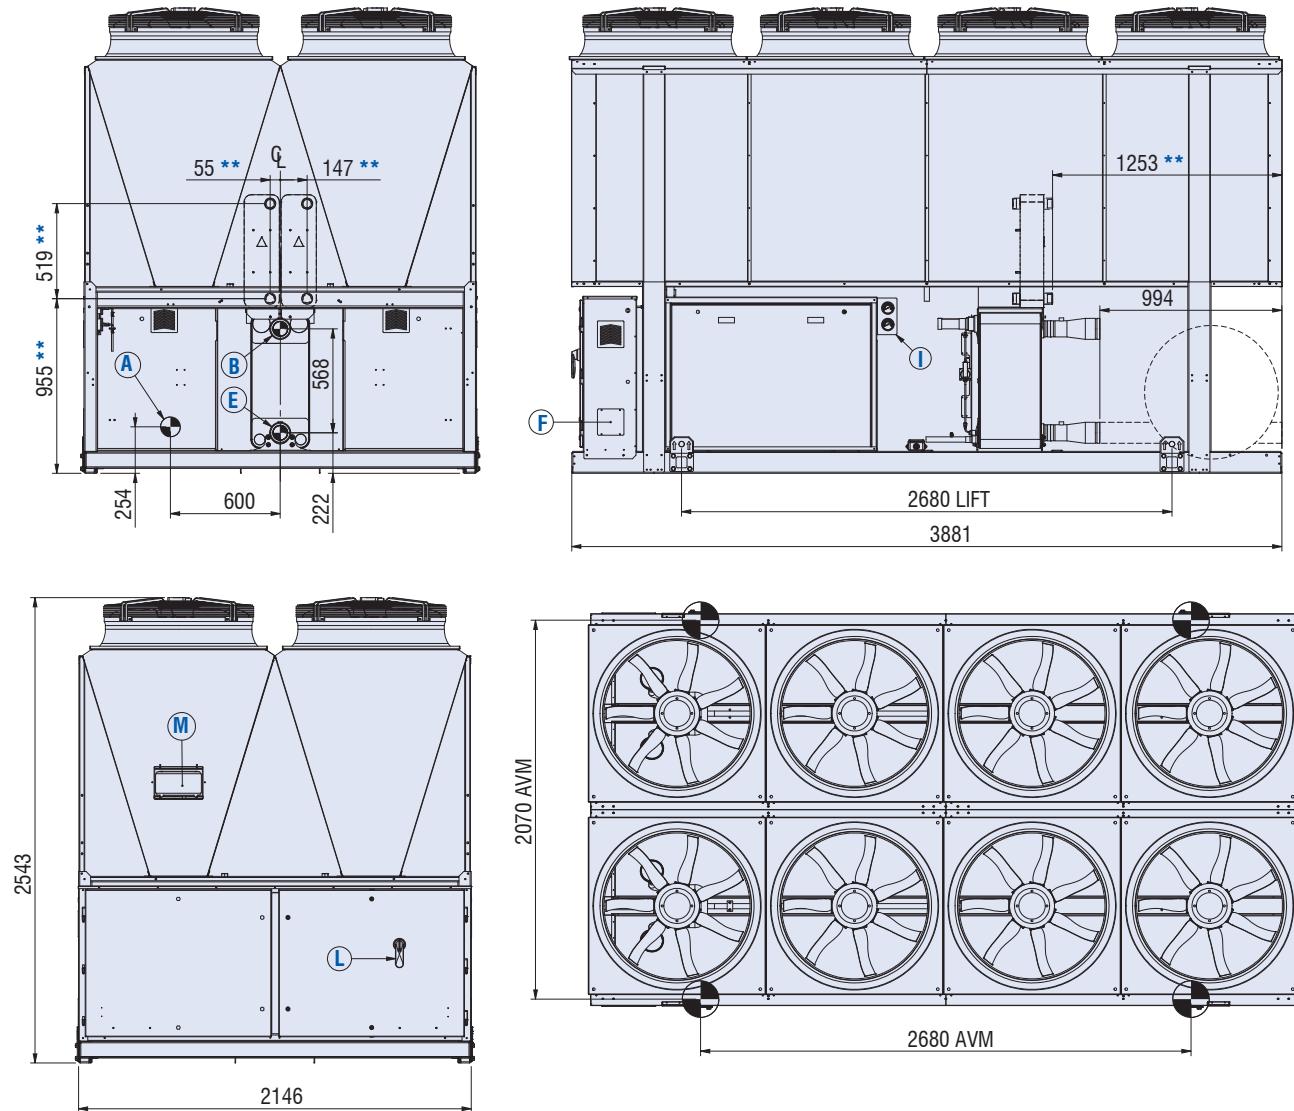

### Pump static head pressure (high head pumps) - Model 1806

### Pump static head pressure (high head pumps) - Models 2106 & 2406

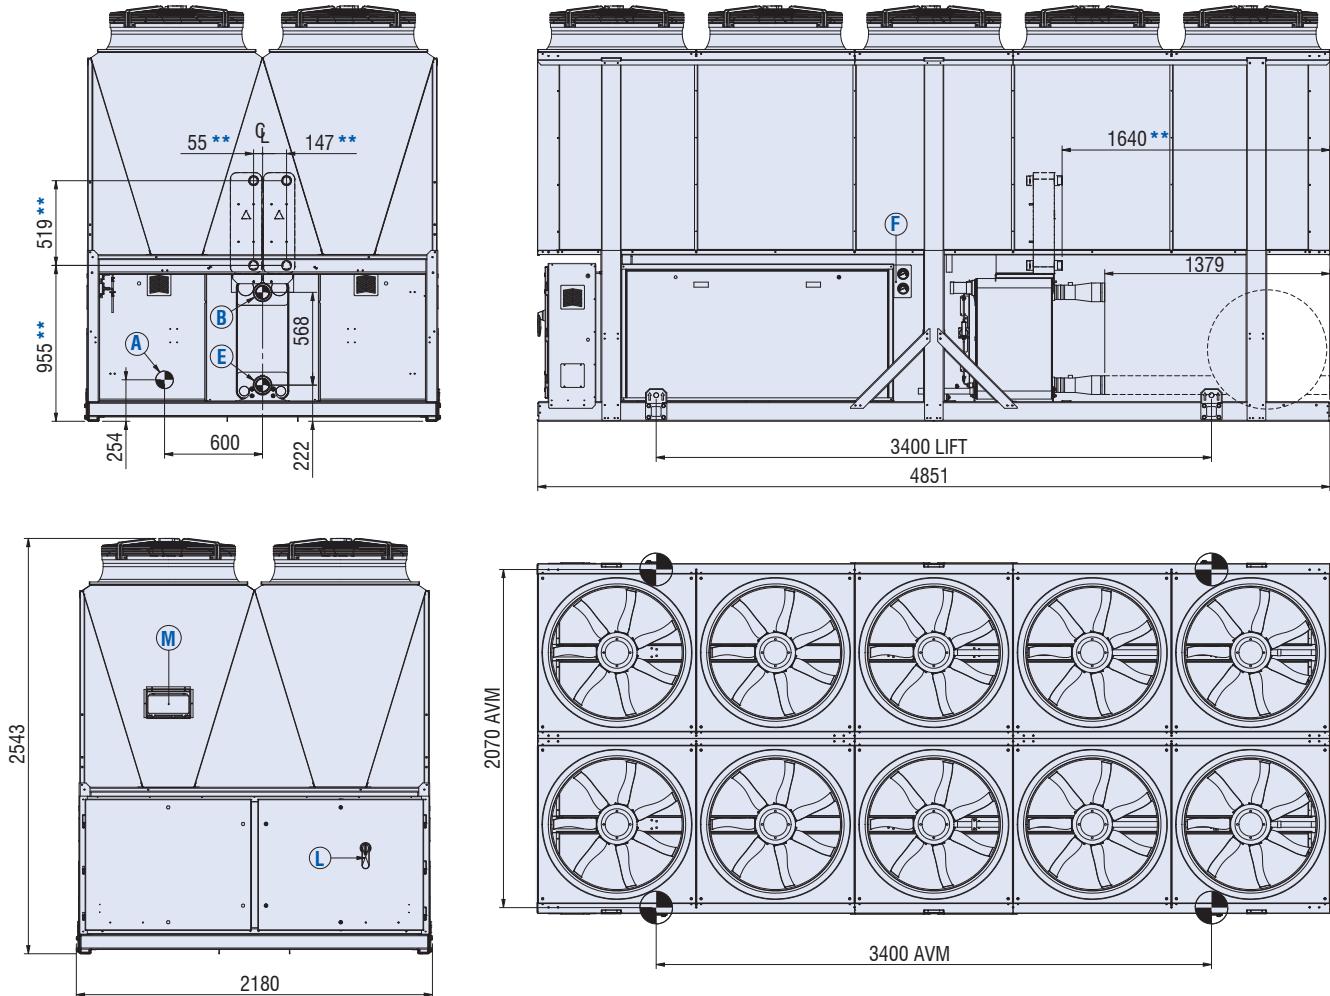

## Dimensions (mm) - AQWL/AQWH 1404 & 1604

A	Water connection 4" Victaulic Ø104 mm
B	Water connection 4" Victaulic Ø104 mm
C	Water connection 4" Victaulic Ø104 mm
D	Water connection 4" Victaulic Ø104 mm
E	Water connection 4" Victaulic Ø104 mm
F	Electrical power supply
I	Gauge kit (accessory)
L	Main switch
M	Control keypad / Display
N	Optional desuperheater water inlet Ø2" gas **
O	Optional desuperheater water outlet Ø2" gas **

Hydraulic option	Water in	Water out
STD	B	E
1P/2P/T *	A	E

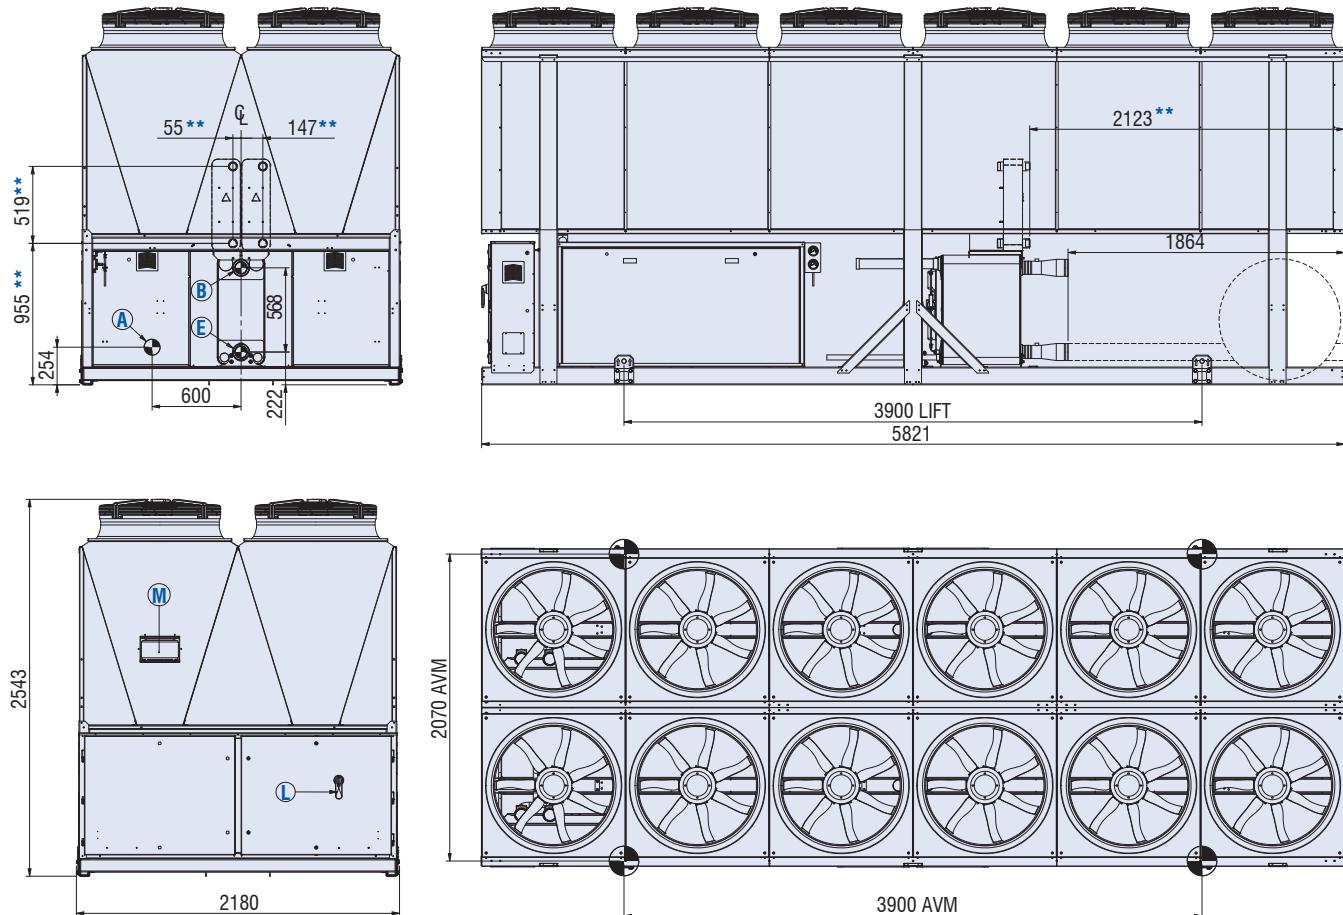

## Dimensions (mm) - AQWL/AQWH 1806

A	Water connection 4" Victaulic Ø104 mm
B	Water connection 4" Victaulic Ø104 mm
C	Water connection 4" Victaulic Ø104 mm
D	Water connection 4" Victaulic Ø104 mm
E	Water connection 4" Victaulic Ø104 mm
F	Electrical power supply
I	Gauge kit (accessory)
L	Main switch
M	Control keypad / Display
N	Optional desuperheater water inlet Ø2" gas **
O	Optional desuperheater water outlet Ø2" gas **

Hydraulic option	Water in	Water out
STD	B	E

ARRANGEMENT 2	2	2	2	2	2	2	1.5	2	1.5	1.0	2	2	2	2	2

**Note :** No more than one wall can be higher than the unit.

The area enclosed by the wall must be kept clear of all obstructions that would impede air flow to the unit. Dimensions in metre.
