1. CEILING WALL TYPE :

AW*Z14LBC

AW*Z18LBC

AW*Z24LBC

1. FEATURE

- **MODEL :**
AW*Z14LBC
AW*Z18LBC
AW*Z24LBC

■ FEATURES

- **Energy saving CLASS A cleared with a margin to spare**
- **Automatic filter cleaner** **WORLD FIRST** *1
Entire filter is cleaned automatically in approx. 2 minutes

Since the filter is cleaned automatically, energy saving capability is displayed without regard to the load on the air conditioner.

- **Bacteria eliminating countermeasure**

- a **Dirt and dust are bacteria-eliminated by photocatalytic filter***

* Displays double the effect of a conventional optical medium and retains its property for a long time to suck in and remove approx. 99.99% of cigarette odors and bacteria, etc.

- b **Drives away bacteria and refreshes the air by UV (ultraviolet rays) illumination**

- **Our unique technology that achieved top energy efficiency in the industry**

- c **Energy saving by automatic filter cleaning function^{*1}**

This function allows an energy saving of more than 25% a year and maintains a smooth airflow by preventing the filters from being clogged with dust.

- d **Computer-designed fan provides a larger airflow than conventional models**

New air trunk, which provides a smooth airflow, and axial gap fan motor increase the max. airflow by 10% over that of conventional models.

CAE analysis

CAE:Computer aided engineering

- e **Axial gap fan motor enables nonconventional high power and high efficiency^{*2}**

Axial gap method

Rotor plates are installed above and below electromagnets.

Antibacterial dust box

Removes dirt and dust by double brushes. Dust collection is approx. twice that in the past. (our company comparison)
Maintenance: Only throwing into a trash bin once every 2 years

Features (Compared to conventional models)

Compact size with 1.5 more power output Self-driven method increases rotating efficiency by 10%. Our electromagnetic field simulation technology enables low vibration and low noise.

*1: Announced September 9, 2002. In room air conditioner for the home (Our company's investigation)
*2: Announced December 13, 2004. As fan motor for air conditioner (Our company's investigation)

● **ALL DC**

a DC fan motor

b V-PAM control

V-PAM technology makes a compressor more powerful.

c DC compressor

Front view

● **"Vertical airflow" provides powerful floor level heating**

No.1 Heating capacity

Air is blown directly downward

*Compared to our conventional Model ASY13PSCCW

● **"Horizontal airflow" does not blow cool air directly at the occupants in the room**

Blown out horizontally

*Compared to our conventional Model ASY13PSCCW

● **Super quiet**

Air flow mode can be set in 5 steps and more detailed air flow setting is possible.

● **Inner drying operation**

This model is equipped with an inner drying function. After the power is turned off, the dry operation starts inside the air conditioner. This prevents the growth of mold and bacterial inside the air conditioner.

● **Low outdoor air temperature cooling correspondence**

Corresponds to cooling operation at -10°C outdoor air temperature

● **Low outdoor air temperature heating correspondence**

Corresponds to heating operation at -15°C outdoor air temperature

● **Corresponds to maximum 30m long piping (24TYPE)**

2. REMOTE CONTROLLER

2-1. WIRELESS REMOTE CONTROLLER

■ FEATURES

- * Four kinds of timer setup (ON / OFF / PROGRAM / SLEEP) are possible.
- * Four kinds of timers. Easy operation.

● Built-in timers

Select from four different timer programs (On/Off/Program/Sleep).

● Program timer

The program timer operates the ON and OFF timer once within a 24 hour period.

● Sleep timer

The sleep timer function automatically corrects the temperature thermostat setting according to the time setting to prevent excessive cooling and heating while sleeping.

Cooling operation/dry operation

When the sleep timer is set, the set temperature automatically rises 1 °C every hour. The set temperature can rise up to a maximum of 2 °C.

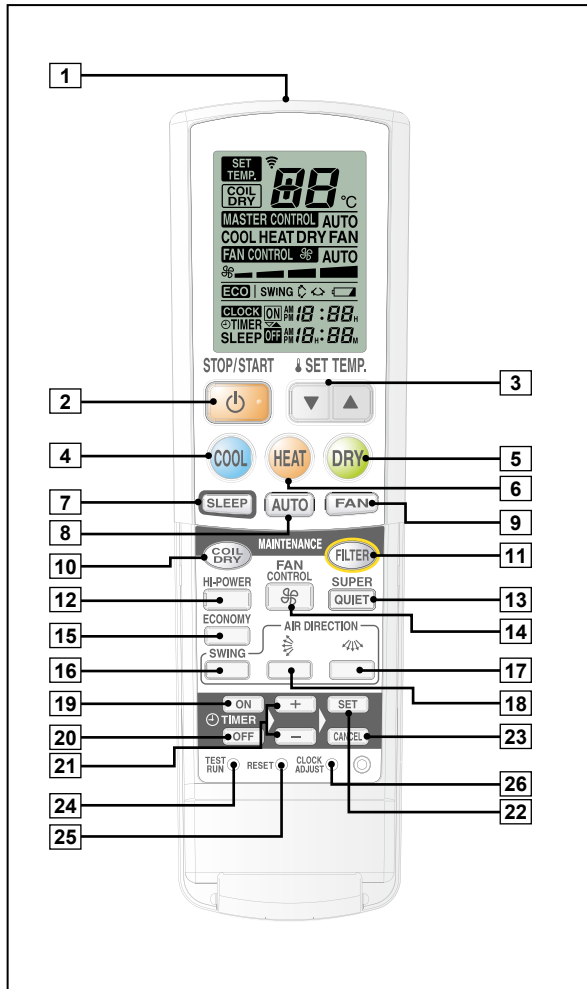

Heating operation

When the sleep timer is set, the set temperature automatically drops 1 °C every 30 minutes. The set temperature can drop to a maximum of 4 °C.

Note :

Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB. and outdoor temperature of 35°CDB/24°CWB.

Heating : Indoor temperature of 20°CDB / 15°CWB. and outdoor temperature of 7°CDB/6°CWB.

Pipe length : 7.5 m, Height difference : 0 m. (Outdoor unit - Indoor unit)

The maximum current is the maximum value when operated within the operation range (temperature).
